INTRODUCTION

Arms Law & Claw Law® deals with the integration of armed and unarmed combat into a fantasy role playing environment. It is designed to be used as one of the three cornerstones of the *Rolemaster*™ system or as the melee and missile combat system for other FRP games. In the latter case, it can be used as a whole or in parts. Now reformatted and reorganized, 2nd Edition *AL&CL* can add flavor, realism, and depth to your campaign without sacrificing playability.

AL&CL has been designed to provide a logical, detailed, manageable procedure for resolving combat between individuals and small groups. Although this system may be unwieldy for melees involving more than 30 combatants, the guidelines can easily be simplified for such situations.

In addition to the comprehensive set of standard rules, optional rules are provided to provide even greater detail and depth. A Gamemaster should examine each of these rules to determine if it is appropriate for his game and world system.

Certain simplifications and organizational devices have been used to increase playability. Nonetheless, consistence and flavor are emphasized. After all, the world of combat is a exciting one indeed.

KEY FEATURES

- A fantastic medieval melee and missile combat system with individual attack tables for thirty weapons and statistics for dozens more.
- A dozen attack tables that integrate the size, instincts, and fighting patterns of a wide variety of animals, monsters, and practitioners of the martial arts .
- Ten Critical Strike Tables for: Slashing, Puncturing, Krushing, Grappling, Unbalancing, Tiny Animal Attacks, Large Creatures, Super-Large Creatures, Martial Arts Striking, and Martial Arts Sweeps & Throws.
- A Fumble table and a Moving Maneuver table.
- Comprehensive rules cover every essential aspect of armed and unarmed combat in a FRP environment: fumbles, parrying, moving, maneuvering, critical damage, initiative determination, orientation, armor, and much more.

THE TABLES

The *Arms Law* tables are organized by a numbering system that begins with "8."; while the *Claw Law* tables are organized by a numbering system that begins with "11." This numbering system is the result of the fact that the two parts were originally published as separate products: *AL* in 1980 and *CL* in 1982.

This 2nd Edition of *Arms Law & Claw Law* maintains that numbering system even though all of the tables are grouped together by type: i.e., all critical tables together, all attack tables together, etc. In addition, all of the tables are found in back of this product for ease of use. We decided to maintain the original numbering scheme because most of the ICE products in print refer to these tables by the original numbering scheme.

In order to help alleviate some of the problems caused by this organization, we have provided a Table Index found on the last few pages and the Table of Contents found on pages 2 and 3.

1.1 ROLEMASTER

Rolemaster (RM) is ICE's complete fantasy role playing system, combining *Arms Law & Claw Law (AL&CL)*, *Spell Law*® (*SL*), and *Character Law & Campaign Law*™ (*ChL&CaL*). The "non-boxed" rules in *AL&CL* are designed to be used with the standard *Rolemaster* system. The rules in *ChL&CaL* are intended to coordinate and combine all of the individual *RM* systems. Thus the rules in *ChL&CaL* should take precedence over the rules in the other individual products when the complete *RM* system is used.

Rolemaster has 5 separately indexed sets of rules:

<i>Arms Law & Claw Law</i>	(AL or AL&CL)
<i>Spell Law</i>	(SL)
<i>Character Law</i>	(ChL)
<i>Campaign Law</i>	(CaL or CpL)
<i>Rolemaster</i>	(RM)

In general, a specific rules "section" in *Rolemaster* is referenced by using the abbreviation for the appropriate set of rules, the word "Section", and the appropriate section number (or numbers or range of numbers). For example, this text is in *AL&CL* Section 1.0. If a section is referenced without an abbreviation, that section can be found in the same set of rules as the reference. For example, this text is in Section 1.0.

ROLEMASTER SUPPLEMENTARY MATERIAL

Rolemaster is supported by a variety of play aids. Such products can decrease the time and effort required for the creation of an exciting game, and increase the amount of realism and detail obtained during play. These play aids include:

Creatures & Treasure™ (*C&T*) — ICE's compendium of information and statistics for three key elements of fantasy role playing: creatures, treasures, and encounters. It also includes guidelines and statistics for dozens of new races.

The *Rolemaster Companions*™ (*RMCs*) — Compendiums of new spell lists, new professions, new races, new monsters, and a variety of other optional material, rules, and guidelines.

The *Shadow World*™ Series — Modules and adventures in a rich, self-contained fantasy environment designed specifically for use with for *RM*, but which can be used as isolated or hidden areas in any GM's campaign world.

ICE's *Middle-earth*® Series — A wide variety of rules, guidelines, and modules for use with fantasy role playing in J.R.R. Tolkien's *Middle-earth*.

Note: For readability purposes, these rules use standard English grammar when referring to persons of uncertain gender: i.e., masculine pronouns. In such cases, these pronouns are intended to convey the meanings: *she/he, his/her, etc.*

1.2 OTHER FRP SYSTEMS

If you wish to use *AL&CL* with another FRP system, just read the material given in the Boxed sections like this one found throughout the rules. These Boxed sections give suggested guidelines and information that are useful when integrating *AL&CL* into your non-*Rolemaster* FRP game.

In addition, Section 10.0 provides further guidelines for non-*Rolemaster* GMs; specifically role players who use the *AD&D*® system*.

**AD&D*® is TSR's trademark for fantasy role playing products, and these references are in no way meant to indicate that ICE has a license from TSR with regard to this or any of our products.

1.3 DICE ROLLING CONVENTIONS

Each die used in *AL&CL* is a 20-sided dice which gives a result between 0 and 9. If two of these dice are used, a variety of results can be obtained. However, results between 1 and 100 are the primary basis of the *AL&CL* system (i.e., RM is a "percentile" system).

Note: 20-sided dice can be obtained at your local hobby and game stores.

PERCENTILE ("1-100") ROLLS

1-100 Roll — Most of the rolls in *Rolemaster* are "1-100" rolls (also called "D100" rolls). To obtain a 1-100 result roll two dice together — one die is treated as the "ten's" die and the other as the "one's" die (designate before rolling, please). Thus a random result between 01 and 100 (a "00" is treated as 100) is obtained.

Example: *The GM asks a player to make a 1-100 roll. The two dice are rolled; the ten's die is a "4" and the one's die is a "7". Thus the result is "47".*

Low Open-ended Roll — To obtain a "low open-ended roll" first make a 1-100 roll. A roll of 01-05 indicates a particularly unfortunate occurrence for the roller. The dice are rolled again and the result is subtracted from the first roll. If the second roll is 96-00, then a third roll is made and subtracted, and so on until a non 96-00 roll is made. The total sum of these rolls is the result of the low open-ended roll.

Example: *The GM asks a player to make a low open-ended roll, and the initial roll is a 04 (i.e., between 01 and 05). A second roll is made with a result of 97 (i.e., between 01 and 05); so a third roll is made, resulting in a 03. Thus, the low open-ended roll that the GM requested is -96 (= 04 - 97 - 03).*

High Open-ended Roll — To obtain a "high open-ended roll" first make a 1-100 roll. A roll of 96-00 indicates a particularly fortunate occurrence for the roller. The dice are rolled again and the result is added to the first roll. If the second roll is 96-00, then a third roll is made and added, and so on until a non 96-00 roll is made. The total sum of these rolls is the result of the high open-ended roll.

Example: *The GM asks a player to make a high open-ended roll, and the initial roll is a 99 (i.e., between 96 and 100). A second roll is made with a result of 96; so a third roll is made with a result 04. Thus, the high open-ended roll that the GM requested is 199 (= 99 + 96 + 04).*

Open-ended Roll — An open-ended roll is both high open-ended and low open-ended.

NON-"1-100" ROLLS

1-10 Roll — In instances when a result (roll) between 1 and 10 is required, only one die is rolled. This gives a result between 0 and 9, but the 0 is treated as a 10. Such a roll is referred to as "1-10" or "D10".

1-5 Roll — Roll one die, divide by 2 and round up ("1D5").

1-8 Roll — Roll one die; if the result is 9 or 10, reroll until a 1 to 8 result occurs ("1D8").

2-10 Roll — Roll two dice, divide each result by 2 (round up), and then add the two results to obtain the "2-10" ("2D5") result.

Other Required Rolls — Any other required rolls are variants of the above.

UNMODIFIED ROLLS (UM)

Certain results on some rolls indicate an immediate effect and no modifications are considered. These rolls are marked on the appropriate charts with a UM. For example, all weapon attacks result in a fumble if the initial unmodified 01-100 roll falls within the fumble range of the weapon.

DEFINITIONS

The majority of unique terms found in *AL&CL* are not described below; rather they are usually described when they are used in the text. The terms defined below are frequently used or they are very important for using and understanding *AL&CL*.

Action: An action is the activity which a character may perform during a round (10 seconds).

Attack Roll: A "Roll" that is used to determine the results of a melee or missile attack.

Chance: Often in *AL&CL* an action or activity has a "chance" of succeeding or occurring, and this chance is usually given in the form of # %. This means that if a roll (1-100) is made (see below) and the result is less than #, then the action or activity succeeds (or occurs); otherwise it fails. Alternatively, you can roll (1-100) and add the result to the #; if the result is greater than 100, then the action or activity succeeds (or occurs); otherwise it fails.

Combat Roll: See "Attack Roll."

Concussion Hits: See "Hits."

Critical Strike: Unusual damage due to particularly effective elemental attacks. **Note:** *The term "critical" will often be used instead of "critical strike".*

Defensive Bonus (DB): The total subtraction from the combat roll due to the defender's advantages, including bonuses for the defender's quickness, shield, armor, position, and magic items.

Dice Roll: See "Roll."

Experience Level (Level): A character's level is a measure of his current stage of skill development, and usually is representative of his capabilities and power.

Fire: To make a missile attack (verb) or missile attack(s) (noun).

Fumble: An especially ineffective attack or mishandling of a weapon which yields a result that is disadvantageous for the attacker.

Gamemaster (GM): The gamesmaster, judge, referee, dungeon-master, etc. The person responsible for giving life to a FRP game by creating the setting, world events and other key ingredients. He interprets situations and rules, controls non player characters, and resolves conflicts.

Hits (Concussion Hits): Accumulated damage, pain, and bleeding, that can lead to shock, unconsciousness, and sometimes death (also called Concussion Hits). Each character can take a certain number of hits before passing out (determined by his "Body Development" skill).

Initiative: The factor that determines which the order in which combatants resolve their attacks, i.e., the combatant with the highest initiative attacks first.

Level: See "Experience Level."

Maneuver Roll: A roll that is used to determine the results of a maneuver.

Maneuver: An action performed by a character that requires unusual concentration, concentration under pressure, or a risk (e.g., climbing a rope, balancing on a ledge, picking a lock, etc.). Maneuvers requiring movement are "Moving Maneuvers" (MM), and other maneuvers are called "Static Maneuvers" (SM).

Melee: Hand-to-hand combat (i.e., combat not using projectiles, spells, or missiles) where opponents are physically engaged — be it a fistfight, a duel with rapiers, or a wrestling match.

Missile weapon: In *Rolemaster* this indicates a low velocity airborne projectile, usually from a manually fired weapon. Such weapons include an arrow from a bow, a quarrel from a cross-bow, a stone from a sling, etc. Thrown weapons are also included in this area. Normally, missile weapons do not include projectiles fired by explosions or other high-velocity propulsion means (e.g., guns are "projectile weapons").

Offensive Bonus (OB): Each character has an "offensive bonus" when he is using a weapon — this OB includes bonuses for the character's stats, superior weapon, skill rank, magic items, etc. This OB is added to any attack rolls that are made when he is using that weapon.

Orientation Roll: A roll representing a character's degree of control following an unusual action or surprise.

Parry: The use of part of a character's offensive capability to effect an opponent's attack.

Profession (Character Class): A character's profession is a reflection of his training and thought patterns; in game terms, it affects how much effort is required to develop skill in various areas of expertise.

Projectile weapon: As opposed to a missile weapon, this indicates a device which mechanically fires a high-velocity projectile (e.g., a gun).

Realm: All spells and the power required to cast spells are classified in the three "realms" of power: Essence, Channeling, and Mentalism.

Resistance Roll (RR): A dice roll which determines whether or not a character successfully resists the effect of a spell, poison, disease, or some other form of adversity.

Roll: In *AL&CL* two different colored 20-sided dice are used to resolve any activity requiring a "Roll"; such dice are available in most hobby and toy stores. Each of these dice has two sets of the numbers: 0,1,2,3,4,5,6,7,8, and 9. These dice can be used to obtain a variety of results. These various results are described in Section 1.3.

Round: The time (10 seconds) required to perform one action.

Self-reloading: Refers to any weapon which reloads (or re-charges) itself and is ready for another shot almost immediately (i.e., it is capable of two attacks in the same round). Most projectile weapons fall into this category, while normal bows and thrown weapons do not. Normally self-reloading weapons only occur in FRP games in the form of magic items.

Shot: A missile attack.

Skill: Training in an area which influences how effectively a character is able to perform a particular action or activity. "Skill Rank" is a measure of the effectiveness of a specific skill.

Stat (Characteristic): One of 10 physical and mental attributes which are considered most important to an adventurer in a FRP game. Stats dictate how well a character develops his skills, moves, fights, takes damage, absorbs information, etc.

Static Action (Static Maneuver): An action performed by a character which requires unusual concentration, or thought under pressure, and does not involve pronounced physical movement.

Swing: A melee attack (noun) or to make a melee attack (verb).

Target: The term "target(s)" refers to the being(s), animal(s), object(s), and/or material that a melee attack, missile attack, or spell attempts to affect.

THE TACTICAL COMBAT SEQUENCE

The *Rolemaster* tactical combat sequence is based on a time frame of 10 second battle rounds and one minute turns (i.e., 6 rounds equal one turn). Normally, each combatant is allowed one attack roll per round, whether it be a spell, missile (bow and thrown fire), or melee. The rationale behind allowing missile and melee combatants only one roll every ten seconds is that, though he or she may actually swing or fire more often than this, only one effective attack is made in a given round. The other swings/shots are assumed to be nullified by a shield, movement, a weapon, and/or fate.

The basic principle to keep in mind is that each action takes a percentage of a round to complete. For example, one can view a physical attack as at least a 50% activity, casting a spell as a 75% activity, preparing a spell as a 90% activity, and movement as a 0-100% activity. Thus someone that casts a spell may not make another attack.

The time allotted to each round may vary with the game system and the preference of the GM, but the following sequence of action is recommended with rounds or turn segments of 6 to 10 seconds each.

CHANGES FROM 1ST EDITION AL&CL

2nd Edition *AL&CL* and *Rolemaster* assume that missile (bow and thrown weapon) attacks take 50% activity as opposed to the normal 75% for 1st Edition *RM*. For consistency, both 2nd Edition *RM* and ICE's science fiction RPG, *Space Master*, use this 50% figure with very specific "reloading" times.

Even though they are not normally encountered in an FRP game, allowances have been made for multi-shot (i.e., self-reloading) weapons like revolvers, submachine guns, and plasma repeater rifles. After all, certain magic items might have this capability.

The *RM* "Missile" phases are now called "Fire" phases, and there are now two Fire Phases (and of course, two Fire Result Phases). Only hand weapons which do not require reloading may fire in both phases (e.g., not a bow, crossbow, or single shot firearm). Examples are revolvers, automatic pistols, and assault rifles from our world. These weapons can be fired more easily and frequently, and are thus offered two rolls during the round sequence. Details of exactly how self-reloading weapons are to be used are found later in this section. If you do not have self-reloading weapons in your game just ignore Fire Phase (B) and Fire Result Phase (B).

3.1 THE BATTLE ROUND SEQUENCE

The expanded *Rolemaster* combat round sequence is shown below, with the new additions asterisked.

- 1 — Spell Action Phase
- 2 — Spell Results Phase
- 3 — Spell Orientation Phase
- 4 — Fire Phase (A)
- 5 — Fire Result Phase (A)
- 6 — Movement/Maneuver Phase
- 7 — Fire Phase (B) *
- 8 — Fire Result Phase (B) *
- 9 — Melee Phase
- 10 — Melee Result Phase
- 11 — Final Orientation Phase

SPELL PHASE

All combatants who will cast (or prepare) a spell during this round must specify any pertinent information to the GM (spell type, target, option to wait for opportunity fire, etc.). If any spells are to be cast/prepared, they would also be specified in this phase.

SPELL RESULTS PHASE

All "cast" (not prepared) spells specified in the previous phase are resolved simultaneously, unless an exception is indicated by the system or the GM. Effects are applied immediately, except spells held on opportunity.

- Movement/Maneuver is reduced to a maximum of 25% of normal for those who have cast a spell this round, and 10% for those who have prepared a spell.

SPELL ORIENTATION PHASE

All combatants who performed unusual activities during the previous phase (e.g., Teleportation, Leaving, etc.) must make an orientation roll to determine how well they have adapted themselves to their new surroundings. An exceptionally low roll might incapacitate them for the remainder of the round and prejudice their chance for successful action in the next round, while an exceptionally high roll would indicate the best possible result (intermediate values should be adjusted by the GM if necessary). The GM must determine what constitutes unusual activity within the context of the situation.

FIRE PHASE (A)

All combatants who will fire during this phase must specify missile type, target/target area, and any other pertinent information. Users of self-reloading weapons (e.g., usually automatic/semi-automatic projectile weapons) are able to fire in both this and Fire Phase B. Users of missile (bow) weapons and thrown weapons may fire in either phase, but only one. Exception: theoretically a character with a throwable weapon in each hand may throw one in Fire Phase (A) and one in Fire Phase (B).

- Spell casters/preparers may not fire.

FIRE RESULT PHASE (A)

All missile attacks specified in the previous phase are resolved simultaneously, unless an exception is indicated. All results are applied immediately. In the following phases, all Phase (A) firers have 50% of their activity left and thus may:

- Melee with a -50 mod to OB; or
- Move/maneuver at 50% of normal; or
- Fire normally in Fire Phase (B) (self-reloading weapons only).

MOVEMENT/MANEUVER PHASE

All combatants in play may move up to the maximum of their movement allowance (depending on any activity engaged in during the earlier phases, and the movement system being used, see Section 7.2). Success or failure of an extraordinary maneuver must be resolved as indicated in Section 7.1.

- Normally, drawing a weapon takes 20% of normal activity while changing weapons takes 50% of activity.

FIRE PHASE (B)

Same as Fire Phase (A), except that a character may not fire if he has done any of the following this round:

- Cast/prepared a Spell.
- Fired in Fire Phase (A) and moved/maneuvered.
- Moved/maneuvered more than 50% of normal allowance.
- Been incapacitated and/or failed an orientation or maneuver roll.

FIRE RESULT PHASE (B)

Essentially the same as Fire Result Phase (A).

MELEE PHASE

All characters may make a melee attack except those who have used more than 50% of their activity for the round. That is, they may not have done any of the following this round:

- Cast or prepared a spell.
- Fired in Fire Phase (A) and moved/maneuvered.
- Moved/maneuvered and fired in Fire Phase (B).
- Fired in Fire Phase (A) and fired in Fire Phase (B).
- Moved/maneuvered more than 50% of normal allowance.
- Been incapacitated and/or failed an orientation or maneuver roll.

MELEE RESULT PHASE

Within each group of combatants attempting to melee attack each other, attacks are conducted according to the following sequence:

- 1) Determine order in which combatants will attack by comparing initiative (Quickness, and other factors, depending on circumstance); see Section 6.1.
- 2) First combatant attack and result are applied immediately.
- 3) Second combatant, third combatant, etc., attack and apply results in order.
- 4) First combatant attacks with any useable second weapon, if any (e.g., he entered melee with a weapon in each hand, he is hasted, etc.).
- 5) Second, third combatants, etc., attack with second weapon, if any.

FINAL ORIENTATION PHASE

In the judgment of the GM, any combatant who has been under significant pressure (e.g., surprise), or has made an unusual maneuver may be required to make an orientation roll, which may affect his ability to act in the next round.

3.2 EXCEPTIONS

OPPORTUNITY ACTION

Combatants may plot *opportunity action* if they wish to perform a combat activity in a following phase of the current round or a following round. For example, a combatant may wish to withhold casting a spell until he sees who is moving where, and then cast. Opportunity action is announced during the correct phase for the desired action. Movement restrictions apply as if the combatant had actually performed the action during the correct phase. A combatant who has planned opportunity action can take no other action (except reduced movement) until the action is performed or cancelled. Opportunity action occurs first in a phase, unless otherwise indicated by the GM.

Example: *During the spell phase, a combatant with a prepared spell announces opportunity spell casting. He may then cast the spell in any of the following phases of this and the following rounds. Until he casts the spell, he may neither melee, fire, nor make extraordinary maneuvers. He is also reduced to 25% of his normal movement until the round after he casts the spell or until he cancels this opportunity action. During a fire phase of some following round, a character attempts to fire a bow. The spell user who has planned opportunity fire now casts his spell, resolving it before the bow may be fired. If the bowman is killed or incapacitated by the spell, the attack will not take place.*

OPPORTUNITY FIRE

A combatant may claim Opportunity Fire during any phase of the combat round that he would normally be able to fire, and does not (see above). He may then fire normally during a subsequent phase of the same round or a following round (and would resolve his fire before other combatants). Opportunity Fire must be claimed against a known foe (or group of foes in the same location). It may also be claimed against a terrain feature or specific area (like a window, portal, the corner of a building, etc.).

Example: *Nandar is in combat with several minions of Mormiresûl. During Fire Phase (A), he claims Opportunity Fire on a specific minion he knows is hiding behind a big rock. During the Movement and Maneuver Phase of the next round, the minion breaks from cover and tries to run to a gully where all of his buddies are. He never makes it; Nandar throws his dagger during the Movement and Maneuver Phase and drops him.*

Movement is restricted to 25% of normal until the action is taken or cancelled. A combatant who has declared Opportunity Fire may take no other action (except reduced movement) until the Opportunity Fire is performed or cancelled. Opportunity Fire occurs first in any given phase unless otherwise indicated by the GM. No character may fire more than once in a given phase.

Example: *Assume the same situation as given in the example above. However, this time the minion steps out from behind the rock during the Movement and Maneuver Phase, but Nandar holds his Opportunity Fire. The next phase of the combat round is Fire Phase (B). Nandar decides that he wants to take his shot now, and fires (i.e., throws) first. Nandar's player also wants to take his normal Fire Phase (B) shot with the dagger in his other hand, but the GM indicates (quite correctly) that no combatant may fire twice in the same phase. Nandar's player says that is unfair. The GM says (quite correctly) that Nandar's player is unreasonable. The game then quickly degenerates into a fist-fight and next week, Nandar's player doesn't show up to the game.*

OB PENALTIES FROM MOVEMENT/MANEUVER

If a character moves/maneuvers and then fires in Fire Phase (B) or melees in Melee Phase, he takes an OB mod to that attack. The OB mod is -5 for every 5% moved/maneuvered. In order to fire or melee, the character must have moved/maneuvered less than 51% of his normal allowance **and** may not have performed any other activity.

USING MISSILE FIRE WHILE IN MELEE

Normally, a combatant cannot throw or fire missiles while engaged in melee. For these purposes, a combatant is engaged in melee if:

- 1) A foe attacked him in the previous melee phase, **and**
- 2) That foe is still within striking distance (i.e., usually within 5-10'), **and**
- 3) That foe's action for the current round is to melee the combatant.

3.3 ORIENTATION ROLLS

When required by the GM, a combatant must make an orientation roll to determine his degree of self-control and awareness. The GM must determine the difficulty of the orientation, then the combatant makes the orientation roll in the same manner as a maneuver (see Section 7.1). Failure means disorientation and no further action is allowed for that round. Success means that the combatant is under control and aware of the situation, and may take further action that he would normally be allowed. The stat bonus used for orientation rolls is Intuition and the skill bonus is based on the Perception skill.

Example: *Suppose a minion of Mormiresûl sneaks up on Darien the Dragonlord, who is preparing to cast an illusion spell. During the final orientation phase, the GM directs Darien to make an orientation roll to see if he notices the minion sneaking up behind him. Since the minion made a successful maneuver (a stalking maneuver) to sneak up on Darien, the GM assigns a degree of difficulty of "Very Hard". Darien's roll will be modified by +5 for his good Intuition, by +40 for his Perception skill rank of 8, and by -20 because Darien is unusually unobservant when preparing spells. He rolls a 56 for a net maneuver roll of 81 (56 + 5 + 40 - 20). Cross-indexing on Table 8.2.2, we get a result of "40". This means that Darien only has a 40% chance of noticing the minion; Darien makes a second roll of 72 and thus is completely oblivious to the danger approaching him from the rear. The GM should not allow Darien to take any actions to react to the threat of the minion.*

3.4 MOVEMENT CONFLICTS

When two or more combatants attempt to perform conflicting movements or maneuvers (such as two characters who are headed for the same space), the GM may choose to resolve the conflict by having the combatants in question make maneuver rolls (see Section 7.0). If one character succeeds and the other fails, the result is obvious. Otherwise:

- The conflict can be considered a draw, and movement for the involved parties can be terminated at the point of conflict;

or

- The GM can use a comparison of maneuver rolls (higher roll having choice of position) and by common sense. A combination of the two is possible, where one of the characters, due to position, might have an add to his maneuver roll, but phenomenal luck could still beat him.

In these cases of conflicting movement, the GM will have to ultimately decide himself the outcome of the conflict. The maneuver rolls of the involved parties are intended to aid him in his decision.

3.5 CANCELING ACTION

During a round an action declared by a combatant may be canceled before it would otherwise be resolved. A character who has canceled his action may perform one of the following alternative actions:

- Melee with half of his normal OB, **or**
- Move half his normal (not running) movement, **or**
- Make a maneuver modified by -30

The alternative action chosen **must** be performed when the other actions of that type are normally resolved.

3.6 HASTE AND SPEED

Certain spells will modify the normal turn sequence to some degree. The most common of these modifications will be *Haste* (or *Speed*). A person who is hasted will basically have 200% normal activity, but must abide by the sequence restrictions. That is, whatever activity the person takes will have to occur in the proper phase (thus, a hasted person could not move, fight and then move again, denying his adversary the chance to swing back). A hasted person could fire a bow, move, and then melee, **or** attack twice in a melee phase (once at the beginning and once at the end).

- A hasted character may not fire more than twice a round.
- Casting more than one spell/round is still prohibited.

Note: *The effects of Haste on spell casting is covered in SL Section 7.4.*

Note: *Haste also has certain liabilities: e.g., a hasted character expends exhaustion points (see Section 7.2) at double normal rate, a wounded character bleeds at double normal rate, etc. A GM should consider the ramifications of Haste very carefully before using it in his game.*

DEFENSIVE CAPABILITIES

In combat there are many variables which affect the severity of an attack. The defender has several factors which work in his favor, including: armor, shield, quickness, special items, and the ability to parry (i.e., forgo one's attack effectiveness in the interest of self-preservation). Armor is the basic classification of protection, while all other defensive capabilities are expressed in terms of a Defensive Bonus (DB) which will modify the attacker's combat roll in the defender's favor.

8.2.4 ARMOR TABLE

* — Minimum maneuver modification applied to a combatant fully trained in maneuvering while wearing the given armor type. See *ChL* Section 3.4.

† — Maximum maneuver modification applied to a combatant totally untrained in maneuvering while wearing the given armor type. See *ChL* Section 3.4.

‡ — The missile attack penalty acts as a modification to the missile OB for a combatant wearing the given armor. This is meant to reflect the disadvantageous effect of armor worn on the arms of a combatant.

§ — An armor Quickness penalty can reduce or cancel a combatant's Quickness stat bonus for his DB (see Section 4.4.2). Unlike those penalties above, this penalty can only reduce the armor wearer's Quickness stat bonus. It will not reduce a combatant's overall DB below the level that it would be at with a zero Quickness stat bonus.

4.1 ARMOR

Rolemaster armor is the basic protective capability assigned to the material covering the body, and is divided into five categories of four *Armor Types* (ATs) each (for a total of 20 types):

Cloth-Skin Base
Soft Leather Base
Rigid Leather Base
Chain Mail Base
Plate Base

CLOTH-SKIN BASE

Normal cloth attire, robes, and normal animal hides.

Skin (AT 1): — Normal clothing, assumed if other covering is not specified.

Robes (AT 2): — Full-length robes normally worn by spell users and certain other combatants; e.g., a spell user might wear robes that are his spell bonus item (see *SL* Section 6.1.2).

Light Hide (AT 3): — The natural hide of certain classes of animals, both normal and unusual (e.g., Deer, Dog, Wolf).

Heavy Hide (AT 4): — The natural hide of certain classes of animals, both normal and unusual (e.g., Buffalo, Elephant, Bear). The Gamemaster will have to decide on the armor type of the creatures that populate his game.

SOFT LEATHER BASE

The heavy outer garments normally worn as weather protection by certain civilians and as combat protection by some militia and irregulars. Note that this category of armor was called "Pliable Leather" in earlier editions of *AL&CL*.

Leather Jerkin (AT 5): — A leather vest-like covering without arms and reaching only to the waist or mid-thigh.

Leather Coat (AT 6): — A leather coat covering the arms and to mid-thigh.

Reinforced Leather Coat (AT 7): — A leather coat covering the arms and to mid-thigh, but with either rigid-leather sections or metal sections sewn in for reinforcement.

Reinforced Full-Length Leather Coat (AT 8): — A reinforced leather coat (as above) that covers to the lower leg.

8.2.5 SHIELD-PARRY TABLE

Shield Type	Bonus Versus Melee	Bonus Versus Missile	Weight In Pounds	Parry Limitations
Wall Shield	30	40	45-50	None
Full Shield	25	25	25-30	None
Normal Shield	20	20	15-20	None
Target Shield	20	10	5-10	None
Maine Gauche	15*	0	1-3	Cannot parry missile attacks.
One-Handed Arms	5*	0	—	Cannot parry missile attacks.
Two-Handed Arms	5*	0	—	Cannot parry missile attacks. Against One-handed weapons a maximum of 50% of wielder's OB may be used to melee parry.
Pole Arms	5*	0	—	Cannot parry missile attacks. Against non-pole arms a maximum of 50% of wielder's OB may be used to melee parry.
Terrain	(variable)		—	To be determined by the referee (e.g., a stone wall could be used to "parry" a missile attack).

* — Can only be used if weapon not used to attack with or if 100% of OB is used to parry (see Section 4.3).

RIGID LEATHER BASE

Rigid leather armor and the rigid hide covering of creature like certain reptiles and of fantastic creatures such as Dragons.

Leather Breastplate (AT 9): — A rigid breastplate covering the torso to mid-thigh and part of the upper arms.

Leather Breastplate and Greaves (AT 10): — As above, but with leather greaves covering the forearms and lower legs.

Half-Hide Plate (AT 11): — Rigid-leather armor which covers the body completely, and the hide of certain creatures that contain at least a few rigid plates (e.g., Rhinoceros, Alligator).

Full-Hide Plate (AT 12): — As half-hide plate above, except that the rigid leather or plates are harder and/or more plentiful (e.g., Turtles, certain Dragons, Giant Crabs).

CHAIN MAIL BASE

Metal chain link armor, metal scale armor, and the hides of certain fantastic creatures.

Chain Shirt (AT 13): — A chain mail shirt covering the torso to mid-thigh and half of the upper arms.

Chain Shirt and Greaves (AT 14): — As above, but with greaves on the forearms and lower legs.

Full Chain (AT 15): — Chain mail covering most of the body and legs in the form of a shirt and leggings.

Chain Hauberk (AT 16): — A full-length chain mail coat split from the waist in the front and back to facilitate movement. Certain Dragons may be of this armor type.

PLATE BASE

Rigid armor of metal plates and the heaviest animal hides.

Metal Breastplate (AT 17): — A metal breastplate plus smaller plates covering the torso to mid-thigh and part of the upper arms.

Metal Breastplate and Greaves (AT 18): — As above, but with greaves on the forearms and lower legs.

Half Plate (AT 19): — Rigid plate armor covering the body, but with chain mail between the plates, at the joints, and covering the legs.

Full Plate (AT 20): — Rigid plate armor as half plate above, but with plates overlapping at joints, and plate armor covering the legs.

ARMOR PENALTIES

Due to its weight and constrictive nature, there are penalties associated with wearing armor while attempting to maneuver, defend, and throw/fire missiles. These penalties are detailed in the Armor Table (8.2.4), Section 4.3, Section 5.2, and Section 7.0.

4.2 SHIELDS

Shields are represented in combat by a bonus to the wielder's Defensive Bonus. In addition, when fighting with one or two weapons, one weapon may be used as a "shield," but may not be used for an attack in the same round. A shield bonus may only be used against one opponent's attack(s) per round.

These bonuses and other factors concerning shields and parrying are summarized in the Shield-Parry Table (8.2.5).

4.3 PARRYING

A defender may wish to place more emphasis on personal defense than is implicit in the *RM* combat system. Therefore, a combatant may wish to sacrifice some or all of his Offensive Bonus (OB) with the weapon he is presently using, in order to increase his DB (see Section 4.4). Such an action is called *parrying*, though it may be thought of in many combat situations as dodging.

The premise of sacrificing offensive capabilities in order to increase one's defensive capability is a fundamental component in the *Rolemaster*.

PARRYING MELEE ATTACKS

A defender may parry a melee attack during the Melee Phase of the combat round by switching any or all of his OB (with the Melee weapon he is using during the Melee Phase) to DB. All points of OB so switched are converted to enhance DB.

- The designation of this "OB/DB split" is done for all combatants at the beginning of the Melee Phase.
- To parry a Melee attack, the defender must be aware that he will be subject to the attack.
- He must also have a shield, suitable terrain, or a Melee weapon. Some weapons may only be used to parry with a certain percentage of the wielder's OB.
- A combatant may only parry the foe that he attacks.
- If a combatant elects to parry with a weapon with his entire OB, he receives the "shield" bonus for his weapon. However, he must still make an attack with a +0 OB. These bonuses are listed on the Shield-Parry Table (8.2.5).

PARRYING MISSILE FIRE

As with melee parrying, a defender parrying a missile may reduce his OB, in whole or in part, and shift that bonus to his DB. To parry a missile attack:

- The defender must be aware that he will be subject to the attack.
- He must also have a shield (a weapon won't do) or suitable terrain with which to parry the missile.
- When parrying missile fire, the shift must be declared at the beginning of Fire Phase (A) and is only applicable against one missile attack.
- Parrying a missile attack requires 50% of a character's normal activity for a round.

PARRYING LIMITATIONS

A combatant may use part of his OB for missile parrying, another part for melee parrying, and another part for a melee attack; but the sum of these may not exceed his normal OB total. A summary of parrying limitations may be found in the Shield-Parry Table (8.2.5).

Example: *Mûldek has a DB of 50 and an OB of 85. He parries a missile (using his shield) during the Missile Phase with 25 of his OB, resulting in a DB against that attack of 75. Then, during the Melee Phase, he parries a melee attack with 10 of his OB, resulting in a DB of 60 against that attack. Thus, he has a 50 OB left for his own melee attack for the round.*

THE IMPORTANCE OF PARRYING

AL&CL is based upon the assumption that characters will use the option of parrying to protect themselves. In a face to face battle, only berserkers, idiots, and desperate characters always use their entire offensive bonus in attack. Such characters usually do not last long unless they have something special going for them (e.g., incredible armor, incredible luck, super healing facilities, etc.). In most situations a character will and should use part of his offensive bonus to attack with and the rest to increase his defensive bonus and thus protect himself. Of course, in certain situations it is often wise for a character to attack with his entire offensive bonus. For example, when attacking a foe who cannot attack back; or perhaps, when facing multiple opponents.

4.4 DEFENSIVE BONUS

The sum of all bonuses and penalties which affect the defender's susceptibility to being hit and damaged in combat is called the Defensive Bonus (DB). It is the number which is subtracted from the attacker's combat roll. The defender's DB is composed of bonuses for superior/inferior armor, Quickness, position and cover, special items, and Adrenal Defense skill bonus. A defender may also parry (i.e., dodge) incoming attacks by forgoing a portion of his own attack ability (see 4.3). The Defensive Modification Table (8.2.6) summarizes the factors which affect a defender's DB.

Defensive Bonus =

- + *Armor Quality* Bonus
- + (*Quickness* Stat Bonus - *Armor Quickness* Penalty)
- + *Adrenal Defense* Skill Bonus
- + *Position* and *Cover* Bonuses
- + *Spell* Bonuses
- + *Special Item* Bonuses
- + *Shield* Bonus (see Section 4.2)
- + *Parrying* Bonus (see Section 4.3)

8.2.6 DEFENSIVE MODIFICATIONS TABLE

Effect	Category and Notes
+ (variable)	Armor quality bonus, Adrenal Defense bonus, (Quickness stat bonus - armor Qu penalty), spell bonuses, special item bonuses. These factors are usually fixed for a given character. (See Section 4.4.)
+ (variable) + (variable)	Shield bonus (see the Shield-Parry Table 8.2.5). Parrying bonus (see Section 4.2)
+20 +40 +50 +100	Half "Soft" cover (see Section 4.4.4) *. Full "Soft" cover (see Section 4.4.4) *. Half "Hard" cover (see Section 4.4.4) *. Full "Hard" cover (see Section 4.4.4) *.
± (variable)	Miscellaneous (determined by Gamemaster).
Note: Modifications are cumulative unless noted otherwise. * — Only one of these modifications can be applied at any given time.	

ARMOR QUALITY (4.4.1)

Especially good armor in terms of material, construction, or enchantment does not change that armor's basic type, but rather adds a bonus to the wearer's DB. Conversely, shoddy armor will incur a penalty to the wearer's DB. It is highly recommended that Superior Armor bonuses rarely exceed +10 or +15. See *RM* Section 7.3 in *ChL&CaL*.

Example: *Miraj, a rather successful Ranger, wears a Chain Shirt and Greaves (AT 14) taken from the lifeless body of a follower of the Bearer of the Root. The GM has decided that this armor is of superior construction (being made by a highly revered Dwarven smith) and so awards it a +10 quality bonus. This armor is thus AT 14(10).*

QUICKNESS STAT BONUS (4.4.2)

A combatant's DB is modified by his Quickness stat bonus or penalty. If the defender is wearing certain types of cumbersome armor, his Quickness stat bonus may be reduced or eliminated completely (but never below zero); see the Armor Table (8.2.4). A defender only has his Quickness stat bonus factored into his DB if he is aware that he is in a combat situation and is free to move.

Example: *Skhan, a T'sbalic warrior, has a temporary Quickness stat score of 98 (good rolling, Skhan!). Unencumbered by armor, Skhan is AT 1(20) (i.e., his DB is 20) when in a combat situation and free to move. Skhan now puts on an metal breastplate which reduces his Quickness stat bonus by 10. Now when he is in combat, barring other modifiers, Skhan is AT 17(10).*

ADRENAL DEFENSE (4.4.3)

As described in the *ChL&CaL* Section 3.8, Adrenal Defense is a skill which adds to a defender's DB. This is a very restrictive DB factor. Normally, the combatant must be aware of his attacker, may not be carrying any heavy items or any weapons (other than those he uses in a weapon kata), and may not be wearing armor. If a defender is using Adrenal Defense, the full skill bonus may be used against Melee attacks, while only half of the normal skill bonus may be used against missile attacks.

POSITION AND COVER (4.4.4)

The GM may award a variable bonus to a defender if his position is judged to be advantageous. Penalties due to a defender's disadvantageous position are reflected in modifications to the attacker's Offensive Bonus (see Section 5.0).

Such bonuses against missile attacks should be based upon the percentage of the defender's body protected and the ability of cover to stop incoming fire.

Here are some sample missile attack cover bonuses:

Half "Soft" Cover	+20
Full "Soft" Cover	+40
Half "Hard" Cover	+50
Full "Hard" Cover	+100

Note: *If a combatant is completely protected by cover, and is making no attack himself, the GM may rule that no attack may be made against him.*

Example: *Múldek, wondering why he ever joined the Confused Young Lords, finds himself defending behind a low stone wall against the combined forces of Mormiresûl and Arxdukanga. During combat, Múldek stands to fire his bow. The wall rises to his waist, protecting him from his foes' missile fire. The GM awards Múldek a cover bonus of 50 to his DB (maybe overly generous, but the GM knows that Múldek is going to need every bit of it).*

SPELLS (4.4.5)

Certain spells may increase a combatant's DB. Such spells are described in *Spell Law*.

SPECIAL ITEMS (4.4.6)

There may be special items (usually magic items) in a GM's campaign which will impart a DB to their possessors. These may range from unique magical artifacts to lucky charms. Their design/strength is subject to the GM's devising.

SHIELDS (4.4.7)

As described in Section 4.2, a shield or a weapon used as a shield will impart a bonus to the wearer's DB against one attack.

PARRYING (4.4.8)

As described in Section 4.3, a defender may commit part of his OB to increase his DB against one attack.

OFFENSIVE CAPABILITIES

The success of an attack will depend heavily on the weapon or weapon combination used (Section 5.1) and the offensive capabilities possessed by the attacker (Section 5.2). The offensive factors which can affect an attack roll include: expertise, physical prowess, experience, superior/inferior weapon(s), weapon combination, special equipment, position, status of the defender and status of the attacker. The sum of all bonuses and penalties related to the attacker is called the Offensive Bonus (OB).

5.1 WEAPON COMBINATIONS

A combatant's capabilities in combat are often dependent upon what weapons he uses. The normal weapon combinations are: no melee weapon, one-handed weapon, a one-handed weapon with a shield, a two-handed weapon, and two one-handed weapons.

NO MELEE WEAPON

Normally a combatant without a melee weapon may not attack and may not parry with his OB (see Section 4.3). However, if such a combatant has a substantial object capable of blocking a weapon blow in his hands (e.g., a stool, a mattress, a log, a body), he may parry with half of his largest melee OB. In such a case, a GM may even allow the combatant to make an attack. (For example, a log might be a -10 club attack.) An object used to parry in this manner may be broken or damaged (see *ChL* Section 7.3.6).

In a similar manner, a combatant may "parry" with suitable terrain features (e.g., dodge around a tree, duck under a large branch, step behind a door). As always, the GM is the final judge as to the appropriateness of such "parrying" situations.

ONE-HANDED WEAPONS

A combatant armed with a single one-handed weapon may attack once per round and parry normally (see Section 4.3).

ONE-HANDED WEAPONS WITH A SHIELD

A combatant armed with a one-handed weapon and a shield may attack normally once per round and parry normally (see Section 3.3). Such a combatant may use his shield bonus for his DB against one foe and then use his parry bonus against the foe he attacks. Alternatively, he may use both bonuses against the same foe.

POLE ARMS

For normal human-sized creatures, these types of weapons require both hands to wield. Thus, they can not be used with a shield. A combatant using a pole arm may only use 50% of his OB to parry an opponent using a weapon that is not a pole arm.

Combatants in the second line should be allowed to strike past friendly combatants (front line) if they are using pole arms. This serves to simulate the effectiveness of organized groups of fighters with pole arms. The GM should determine whether the front line combatants and second line combatants are adequately trained for this type of combat.

TWO-HANDED WEAPONS

For normal human-sized creatures, these types of weapons require both hands to wield. Thus, they can not be used with a shield. A combatant using a two-handed weapon may only use 50% of his OB to parry an opponent using a one-handed weapon.

TWO ONE-HANDED WEAPONS

A combatant may use a one-handed weapon in each of his hands. He is assumed to be right-handed (the same rules apply in reverse for left handed combatants). When a combatant develops skill with (i.e., trains with) a weapon, he must develop the skill with his right hand and skill with the left hand separately (see *ChL* Section 3.0).

- Any weapon used in the left hand automatically gets a -20 modification to the combatant's OB with that weapon.
- The combatant may attack with both weapons in the same round, or he may attack with only one and use the other for its "shield" bonus versus melee (see Table 8.2.5).
- A combatant must direct both his attacks (and parry) against the same target.
- If a combatant uses part of his offensive bonus for parrying, he must decrease both his weapon OBs by that amount.

THROWN WEAPONS

If a stationary combatant is trained with a particular type of throwing weapon, he may throw that weapon using 80% of his normal OB and still melee in the same round with only a -20 modification to his melee OB. Such a combatant may only use a one-handed weapon or a one-handed weapon and a shield on the round that he throws the weapon. (He is assumed to be holding his melee weapon in his non-throwing hand.)

5.2 OFFENSIVE BONUS

The Offensive Bonus is added to the attacker's combat roll during the resolution of a given attack. Below is a descriptive listing of the factors which contribute to a combatant's OB for a specific weapon and a specific situation. The Offensive Modification Table (8.2.7) summarizes the factors which affect a defender's DB.

Offensive Bonus =

- + Skill Bonus (expertise)
- + Stat Bonus
- + Level Bonus
- + Weapon Bonus
- + Spell Bonuses
- + Special Item Bonuses

SKILL — Expertise (5.2.1)

A combatant with expertise in handling a certain weapon receives a "skill bonus" for his OB.

Expertise in *Rolemaster* is measured in terms of skill ranks (see *ChL* Section 3.0). The higher the number of skill ranks one possesses in a given weapon skill, the higher the resultant OB will be. Normally, this bonus is:

- +5 for each of skill ranks 1 to 10
- +2 for each of 10 skill ranks 11 to 20
- +1 for each of 10 skill ranks 21 to 30
- +1/2 for every skill rank over Skill Rank 30.

Example: A combatant with Skill Rank 13 with a mace would have a skill bonus with the mace of $56 = (10 \times 5) + (3 \times 2)$.

STATS — Physical Prowess (5.2.2)

A combatant with extraordinary physical strength and/or agility may receive a "stat bonus" for his OB. For unusually weak and/or clumsy characters this bonus may actually be negative.

See the Bonuses for Unusual Stats Chart below and *ChL* Sections 2.0 and 15.1.4.

Weapon Type	Applicable Stat
Melee	Strength
Bows, Slings	Agility
Thrown	Strength

Example: Elor has a Strength of 95, so his melee stat bonus is +15.

8.2.7 OFFENSIVE MODIFICATIONS TABLE

Effect	Category and Notes
+ (variable)	Skill bonus, stat bonus, level bonus, weapon quality bonus, spell bonuses, special item bonuses. These factors are usually fixed for a given character. (See Section 4.4.)
- (variable)	Parrying bonus (see Section 4.3).
-20	If weapon used in left hand (see Section 5.1).
± (variable)	Range modifications (see individual attack tables).
- (variable)	Reloading penalty (see Section 5.2.12).
- (variable)	Armor missile attack penalty (see Table 8.2.4).
+15	Flank attack.
+20	Rear attack.
+20	Surprise.
+20	Stunned foe *.
+30	Downed foe *.
+50	Prone foe *.
-10	Wounded more than 25% (concussion hits).
-10	Wounded more than 50% (concussion hits).
-10	Wounded more than 75% (concussion hits).
-20	Drawing a weapon (also applies to movement).
-50	Changing weapons (also applies to movement).
- (variable)	Moving (normally the % of possible movement equals the penalty).
± (variable)	Miscellaneous (to be determined by the GM).

Note: Modifications are cumulative unless noted otherwise.

* — Only one of these modifications can be applied at any given time.

LEVEL (Experience) (5.2.3)

Certain character professions get a bonus to their OB based on their level of experience.

See the descriptions of character professions to determine if a given combatant is entitled to such a bonus to the OB (see *ChL* Section 4.0).

Profession	Bonus per Level of Experience
Fighter	+3/level up to 20th, +1/level over 20th
Thief	+2/level up to 20th (max. of 40)
Rogue	+3/level up to 20th (max. of 60)
Warrior Monk	+2/level up to 20th (max. of 40)
Monk, Ranger, Bard	+1/level up to 20th (max. of 20)
Other Professions	no level bonus

Example: A 23rd level Fighter would have a Level Bonus of $+63 = (20 \times 3) + (3 \times 1)$, while a 23rd level Thief would only have a Level Bonus of $+40 = (20 \times 2)$.

WEAPON QUALITY (5.2.4)

Weapons remarkable in material, construction, or workmanship may add a bonus to a combatant's OB (or a penalty for inferior weapons). It is strongly suggested that bonuses for superior quality weapons rarely exceed +10 or +15 (see *RM* Section 7.3 in *ChL&CaL*).

To determine the weapon bonus for a non-thrown missile attack, average the firing device's (i.e., bow or sling) bonus with missile's (i.e., arrow, quarrel, or stone) bonus and round off.

Example: A +10 composite bow firing a +5 arrow would have a weapon bonus of $+8 = (10 + 5) \div 2$.

SPELLS (5.2.5)

Certain spells may increase a combatant's OB. Such spells are described in *Spell Law*.

SPECIAL ITEMS (5.2.6)

There may be special items (usually magic items) in a GM's campaign which will impart a OB modification to their possessors. These may range from unique magical artifacts to lucky charms. Their design/strength is subject to the GM's devising.

POSITION (5.2.7)

At the GM's discretion, a bonus or penalty may adjust a combatant's OB if his position is determined to be somehow superior or inferior to his opponent's. See the Offensive Modifications Table (8.2.7).

Unless stated otherwise, position bonuses are cumulative. For example, a surprise rear attack would get a total position bonus of at least +55: +20 for surprise, +20 for rear attack, and +15 for a flank attack. A non-surprise rear attack would get a total position bonus of +35.

STATUS (5.2.8)

A summary of the various status modifiers to an OB are listed in the Offensive Modifications Table (8.2.7).

PARRYING (5.2.9)

As discussed in Section 4.3, a combatant's OB is lowered for a specific attack by the amount he uses to parry.

LEFT-HAND USE (5.2.10)

As discussed in Section 5.1, a weapon used in the left hand receives a special -20 OB modification.

RANGE (5.2.11)

There is a modification to the firer's OB based upon the distance from the firer to the target. These modifications range from +30 to -75 and are provided on the Weapon Attack Tables (8.3.1-8.7.4).

The missile ranges given on each of the attack tables are the *maximum* ranges for which each of the given OB modifications apply. For example on the Composite Bow Attack Table (8.5.2), attacks made at a range of 0'-10' are modified by +25, attacks at a range of 11'-100' receive no modification, attacks at 101'-200' are modified by -35, attacks at 201'-300' are modified by -60, and attacks over 300' are not allowed.

RELOADING (5.2.12)

The preparation (i.e., reloading) time required between missile attacks is dependent upon the type of weapon and how accurate the firer is attempting to be. The chart below gives the firer's OB penalty due to reloading.

RELOADING CHART (result is the OB penalty)				
Weapon	Number of Preparation Rounds			
	0	1	2	3
Short Bow	10	0	0	0
Composite Bow	20	0	0	0
Long Bow	30	0	0	0
Light Crossbow	na	20	0	0
Heavy Crossbow	na	30	10	0
Sling	10	0	0	0

na = not allowed

The act of firing the weapon always takes one round and requires 50% of the firer's activity (as specified earlier in the rules). A combatant preparing a shot (i.e., reloading) may still take 20% of his normal activity. The figures presented in the table assume the bow is strung and arrows (or quarrels or pellets) are available in quiver (or pouch). If a bow has to be strung, the following rounds are added to the preparation time:

Short Bow +2 rounds
 Composite Bow +3 rounds
 Long Bow +3 rounds

Note: See Section 9.4 for optional reloading rules that express reloading in terms of a combatant's % activity for a round.

ARMOR MISSILE ATTACK PENALTIES (5.2.13)

A combatant making a missile attack receives a penalty to his OB if he is wearing armor that covers his arms. This includes armor types 6, 7, 8, 10, 11, 12, 14, 15, 16, 18, 19, and 20. The specific penalties are summarized on the Armor Table (8.2.4).

5.3 MOUNTED COMBAT

A combatant faces none of the combat movement restrictions when riding an animal (i.e., the animal moves). However, the combatant must be trained in controlling the horse and fighting from horseback in order to be effective. Depending upon his training and background, a mounted combatant can use anywhere from 0% to 100% of his normal OB. This restriction is not in effect if the horse is completely stationary (i.e., moving at more than a slow walk or not bucking).

The OB of a mounted combatant is based upon his normal OB, his riding skill bonus, and bonuses for the mount:

Mounted OB =

Normal OB x (Riding skill bonus + special bonuses) ÷ 100

The Riding skill bonus is described in *ChL* Section 3.6. The chart presented in this section includes some suggested special bonuses based upon the mount.

Certain weapons are at maximum effectiveness only when used mounted on a moving animal. The mounted lance falls into this category. As a result, the spear table should be used if a lance is used on foot or on an animal that is not moving faster than a walk. A full gallop should give a special +20 modification to the OB for an attack by a mounted lance.

MOUNT QUALITY RIDING BONUSES <i>(numbers are cumulative)</i>	
wild horse	-20
farm horse	-10
riding horse	+5
war horse	+20
very intelligent horse	+10

The chart below gives some rider percentages for those not using <i>ChL&CaL</i> .	
untrained rider	-30 and 0% of bonus
novice rider	10% of bonus
trained rider	50% of bonus
expert rider	80% of bonus
master rider	100% of bonus

6.0 COMBAT RESOLUTION

A melee swing or missile attack is resolved by cross-indexing the net attack roll with the target's armor type (AT) on the correct *Attack Table* for the weapon being used. The effects of Failures and Critical Strikes are found on the correct *Fumble Table* or the appropriate *Critical Strike Table*. In each fire phase, all attacks are treated as simultaneous. For melee, first determine the order in which the combatants will swing; then resolve each attack in sequence, implementing the results immediately.

6.1 INITIATIVE DETERMINATION

The quickest combatant normally swings first in a melee, but this may be modified based on a number of factors, including weapon size, weight, etc.

Each combatant should total his initiative points; these points are summarized on the Initiative Determination Table (8.2.8). The combatant with the largest total swings first, then the second largest total, and so on. After all combatants that have melee attacks have made one attack, those capable of making a second melee attack (i.e., those with two weapons or those hasted) calculate their initiative points for their second attacks. These attacks are then resolved as outlined above.

6.2 ATTACK RESOLUTION

The net attack roll representing the swing/missile is the attack roll (high open-ended) **plus** the Attacker's OB **minus** the Defender's DB. Referring to the Attack Table corresponding to the attacker's weapon or attack type, this result is cross-indexed with the Defender's armor type on to arrive at the result of the swing/fire. The armor types are the numbers, 1-20, across the top and bottom of each attack chart.

In certain cases where an attack is especially bad or good, another roll may be required to determine the results of a Failure or Critical Strike.

The attack tables include 30 weapons (8.3.1-8.7.4), 10 animal attack tables (11.1.1-11.2.1), and 2 Martial Arts attack tables (11.2.2-11.2.3). Each one takes into account the capabilities of the weapon or attack type as well as the protective factor and mobility of the armor type.

THE ATTACK ROLL

A swing/missile is represented by rolling percentile dice (high open-ended, see Section 2.0). The result is the Attack Roll (AR) for that swing/missile.

8.2.8 INITIATIVE DETERMINATION TABLE	
Effect	Category and Notes
+ (1-100)	Quickness stat (1-100 base).
+10	Strength (applies to the stronger combatant).
+30	Weapon ready.
0	One-handed weapon.
-10	Two-handed weapon.
+40	Pole Arm, on 1st round of combat between 2 opponents.
-20	Pole Arm, after 1st round of combat between 2 opponents.
+10	Longer weapon when neither opponent is charging.
+30	Longer weapon when one or both opponents are charging.
-5	Two weapon combination.
-10	Shield.
-40	Surprised.
-40	Encumbered.
-40	Wounded more than 50% (concussion hits).
- (variable)	Moving, subtraction equal to % of movement expended.

Note: Total all applicable modifications; the melee combatant with the highest total attacks first.

UNMODIFIED ROLLS

An Attack Roll of 01-10 may indicate an immediate effect, in which case, no modifications are applied.

- An unmodified roll of 01-02 for an animal attack or a martial arts attack (Tables 11.1.1-11.2.3) indicates automatic attack "Failure". Such an attack has no effect on the attacker and no effect on the defender.
- For a weapon attack, if the Attack Roll falls within the weapon's "Fumble Range", the attacker "fumbles" his weapon (see Section 6.3). These fumble ranges are printed on the appropriate weapon attack tables (8.3.1-8.7.4). Such an attack has no effect on the defender may affect the attacker (see Section 6.3).

"96-100" ATTACK ROLL

An Attack Roll is a "high open-ended roll". As outlined in Section 2.0, if such a roll is between 96 and 100, a particularly effective attack has been made. The dice are rolled again and the result is added to the first roll. If the second roll is 96-00, then a third roll is made and added, and so on until a non 96-00 roll is made. The total sum of these rolls is the result of the high open-ended roll; in this case it is the result of the Attack Roll.

Example: *An initial Attack Roll is 97, so the dice are rolled again with a result of 99. Thus, the dice are rolled again with a result of 04. This Attack Roll is 98 + 99 + 04, for a total of 201.*

THE NET ATTACK ROLL

If the Attack Roll does not indicate a Fumble or a Failure, the net attack roll is determined by adding the OB to the Attack Roll and subtracting the defender's DB.

6.3 FUMBLE RESULTS

If an attack results in a fumble (see Section 6.2), a roll must be made and cross-indexed on the Fumble Table (8.2.1) with the column that applies to the weapon being used. The result is immediately applied to the attacker.

Example: *Coma the Half-dwarven Fighter playfully swings his battle axe at "his friend" Trevor, an Elven Sheeplord. His attack roll is 04 and thus falls into the fumble range for a battle axe (i.e., 01-05) — Coma fumbles his weapon. As Trevor begins to laugh, Coma makes a roll of 83 and cross-indexes it with the "Hand Arms (2-hand)" column on the Fumble Table — Coma juggles his weapon for 3 rounds and thus may not attack; he can still parry. If Trevor can stop laughing, he can attempt to fry the juggling Half-dwarf with his magic trident. If Coma's initial roll had been an 06 or better, he would not have fumbled and he would have resolved his attack normally.*

6.4 NON-FUMBLE/FAILURE RESULTS

If an attack does not result in a fumble/failure, the net attack roll is cross-indexed with the defender's armor type on the appropriate attack table — Tables 8.3.1-8.7.4 for weapons, Tables 11.1.1-11.2.1 for animal attacks, and Tables 11.2.2-11.2.3 for martial arts attacks. Treat net attack rolls of more than 150 as 150.

Example: *Mirage makes a net attack roll of 87 and has an OB of 100 with her composite bow. Her target has an AT of 15 and a DB of 30, so her net attack roll is 157. However, since this is greater than 150, it is treated as 150. Cross-indexing AT 15 with a net attack roll of 150, we get a result of "22EP".*

Note that each of the Claw Law Attack Tables (11.1.1-11.2.3) has four "maximum result" thresholds. An attack's net attack roll cannot exceed the designated threshold; instead, the maximum allowed result is used as the net attack roll.

Example: *An animal makes a Medium Claw attack against AT13. The net attack roll is 132, but the threshold for Medium attacks is 120. Thus, the net attack roll used is 120, and the result is "13CP."*

A typical result from a weapon attack table will have three components, for example:

22 EP

The first component will be a number from 0 on up, which is the number of concussion hits delivered to the target. The second component is a letter describing the severity of a critical strike (if any — no letter indicates that no critical strike was delivered). The third component is only present if the second component is present; it is a letter indicating the type of critical strike. In the example above, the target has taken 17 concussion hits and a Puncture type critical of E level severity. If the critical severity is given but not the critical type, the critical type is indicated on the appropriate attack table.

Note: *Krush type criticals are indicated by a "K" result in order to distinguish them from "C" level severity results.*

For animal attacks and martial arts attacks there is no third component. Instead, the critical type is the same for all results from a given attack table and is provided at the bottom of each table.

CONCUSSION HITS (6.4.1)

A number result from an attack indicates that the defender receives that many concussion hits.

Each combatant has a limited number of concussion hits (see ChL Section 2.4 and 3.8). When the limit is exceeded, the combatant is rendered unconscious and can take no further action until he is back under the limit. Death may be caused if this limit is exceeded by a certain amount (see ChL Section 3.8).

The point at which death occurs is proportional to the combatant's physical constitution, and depends on the system used in the game for deriving physical characteristics. The GM will have to decide on the point at which death results (e.g., 2 times the number of concussion hits causing unconsciousness could result in the victim's death, or, alternatively, the number of concussion hits causing unconsciousness added to the victim's Constitution on a 1-100 scale).

CRITICAL STRIKES (6.4.2)

A result of a number followed by one or two letters indicates that the defender receives a number of concussion hits (see Section 6.4.1) and a critical strike.

The first letter (or the only letter) indicates the severity of the critical. The severity of a critical strike (or just critical) ranges from 'A' (least severe) to 'E' (most severe) with the letters 'F' indicating multiple criticals as detailed on the individual animal attack tables.

The second letter (if any) indicates the *critical type*. Criticals of this type are: Slash, Puncture, Krush, Grapple, Unbalance, and Tiny.

If there is only one letter, the critical type is indicated on the appropriate attack table. Criticals of this type are: Martial Arts Striking, and Martial Arts Sweeps & Throws.

When a critical is indicated, a second (1-100, not open-ended) roll is then made and the result is cross-indexed with the severity of the critical ('A', 'B', 'C', 'D', or 'E'). The critical table used corresponds to the *critical type*.

Certain critical strikes have an 'F' severity, indicating two normal critical strikes should be applied to the target. A separate roll is made for each critical and all results are applied cumulatively. The type and severity of these criticals is provided at the bottom of the appropriate attack table.

CRITICALS AGAINST LARGE AND SUPER-LARGE CREATURES (6.4.3)

Certain unusual creatures are so large and/or powerful that the normal critical strike tables are not used when they receive critical strikes. Unusual creatures are separated into two categories:

- *Large Creatures* (Trolls, Giants, Demons, and Undead, etc.).
- *Super-Large Creatures* (Dragons, very powerful Demons, etc.).

Each category has its own critical strike table that is consulted if a sufficiently severe critical strike is obtained against them. The roll for criticals against Large and Super-Large creatures is high open-ended.

LARGE CREATURE CRITICAL STRIKES

Only critical strikes of severity 'B', 'C', 'D', or 'E' affect large creatures (i.e., 'A' severity criticals are ignored). A high open-ended roll is made and cross-indexed with the weapon type on the Large Creature Critical Strike Table (8.1.4). The result obtained is applied immediately.

Note that the severity of the critical strike is irrelevant, except that it must be of 'B' severity or higher. This reflects the fact that such creatures present such a large target that they are much more difficult to seriously hurt.

SUPER-LARGE CREATURE CRITICAL STRIKES

Only critical strikes of severity 'D' or 'E' affect super-large creatures (i.e., 'A', 'B', and 'C' severity criticals are ignored). A high open-ended roll is made and cross-indexed with the weapon type on the Super-Large Creature Critical Strike Table (8.1.5). The result obtained is applied immediately.

This table should be consulted of only for creatures such as Dragons, Dinosaurs, and the most powerful Demons.

SLAYING CRITICALS

Some Large and Super-Large creatures are especially vulnerable to certain magical weapons (e.g., a Troll is vulnerable to a weapon of "Troll-slaying"). If a critical is obtained with such a weapon against a Large or Super-Large creature, the "Slaying" column on the appropriate table is used.

If a critical strike is obtained when using a weapon of slaying for a man-sized creature (e.g., an Orc-slaying sword used against an Orc), the normal critical is resolved and then a second critical is resolved on the slaying column of the Large Creature Critical Strike Table (8.1.4).

CRITICAL INTERPRETATIONS (6.4.4)

Most of the critical strike results are self-explanatory. However, certain results may have to be modified due to circumstances.

Example: *A target behind a low stone wall is hit by an arrow and receives a critical calling for damage to his ankle. Instead the GM should rule that he is hit in the wrist. Note that he already receives a defensive bonus for being behind the stone wall and was hit in spite of it. Similarly, if a critical strike calling for an unspecified limb to be broken is rolled, the limb affected should be determined randomly.*

OVERALL GUIDELINES

- All damage (including concussion hits), unless otherwise noted, is only applicable to the target combatant.
- Often bleeding, bruises, burns, frostbite, etc. indicated on the critical strike tables are reflected in the form of additional concussion hits. This is meant to show the gradual weakening brought about by shock, bleeding, and pain.
- *Next swing/roll* can refer to a missile attack, maneuver, spell attack as well as to a melee attack.
- If a target takes a critical result that lasts for a certain number of rounds and he has not yet performed his action for the current round, the current round counts as one of the rounds affected by the result. Otherwise, the effects begin the round after the critical is received.
- If an item is indicated as being destroyed by a critical result, it is automatically destroyed unless it is made of an extraordinary material (e.g., Mithril) or it is incredibly magical (i.e., an Artifact). In this case, if the GM allows it, the item may make a RR as described in *Spell Law* Section 8.5 to avoid destruction.

CRITICAL & FUMBLE RESULTS

Below we provide guidelines for specific criticals/fumbles.

- + # hits — (e.g., "+5 hits") This many hits (#) are taken in addition to the normal hit result derived from the attack table used. Normally, these hits are **not** increased (i.e., "multiplied") by strength factors (e.g., certain creatures do "3x" normal damage, a *Strength* spell on a character lets him deliver "2x" normal damage, etc.).
- # hits per round — (e.g., "+3 hits per round") Each round after the critical is taken, the target takes this many (#) additional hits due to pain and bleeding.
- ... at -# — (e.g., "Foe fights at -30") All of the target's bonuses (except DB and RRs) are modified by this number (#). These penalties are cumulative. Certain of these penalties apply only to specific skills (e.g., fighting, running, etc.). Alternatively, the GM may elect to treat these penalties as a percentage modification of the target's bonuses (i.e., reduce each bonus by # %).
- Must parry # rounds — (e.g., "must parry 2 rounds") For this number (#) of rounds, the target may not attack; he may only parry with half of his OB, and the only other actions allowed are movement and maneuvers, both modified by at least -25.
- Stunned # rounds — For this number (#) of rounds, the target may not attack, he may only parry with half of his Offensive Bonus (his normal DB due to Quickness, shield, etc. is not affected), and the only other actions allowed are movement and maneuvers, both modified by at least -50.
- Stunned and unable to parry # rounds (Stunned-No Parry) — For this number (#) of rounds, the target may not attack, he may not parry (his normal DB due to Quickness, shield, etc. is not affected), and the only other actions allowed are movement and maneuvers, both modified by at least -75.
- Down (or out) for # rounds — For this number (#) of rounds, the target may not perform any actions.

EFFECTS OF "STUN" ROUNDS

During play a combatant may be "stunned" for a number of rounds due to critical strikes (this includes all "Stunned" rounds, all "Stunned No Parry" rounds, and all "Down or Out" rounds). All of these "stuns" due to multiple critical strikes are cumulative. Normally the total number of rounds of "stuns" decreases by one each round, with the most severe type of "stun" taking effect first.

MANEUVERING AND MOVEMENT

Complete maneuvering and movement guidelines can be found in *Character Law & Campaign Law*. In this section, we present a summary of those guidelines as they apply to combat situations.

7.1 MANEUVERING

Complete maneuvering guidelines can be found in *ChL* Section 3.3. In this section we only present guidelines for moving maneuverers and how they apply to combat.

ASSIGNING A DEGREE OF DIFFICULTY

When a combatant indicates that he wishes to attempt a specific maneuver, the GM should assign a *degree of difficulty* and any special modifications he feels apply. The degree of difficulty is chosen from those listed across the top of the Maneuver/Movement Table (8.2.2) and listed below:

Routine
Easy
Light
Medium
Hard
Very Hard
Extremely Hard
Sheer Folly
Absurd

If the combatant decides not to proceed with the maneuver, he may cancel his action as described in Section 3.5. Otherwise, the combatant makes a maneuver roll. After the maneuver roll is modified by applicable bonuses and penalties (see Table 8.2.9), the net maneuver roll is cross-indexed with the degree of difficulty on Table 8.2.2 to obtain the result.

Note: *It is important to remember that certain maneuvers may be deemed impossible by the GM. The player should be advised that such a maneuver is doomed to failure.*

8.2.9 MANEUVER MODIFICATIONS TABLE

Effect	Category and Notes
-35 to +35	Applicable stat bonus (usually Agility).
-10	Wounded more than 25% (concussion hits).
-10	Wounded more than 50% (concussion hits).
-10	Wounded more than 75% (concussion hits).
- (variable)	Armor, see Table (8.2.4) for maneuver mod.
± (variable)	Applicable skill bonus (see <i>ChL</i> Section 3.0).
± (variable)	Bonuses due to spells (see <i>SL</i>).
± (variable)	Unusual absurdities (determined by GM).
± (variable)	Miscellaneous (determined by GM).

Note: *Modifications are cumulative unless noted otherwise.*

MANEUVER ROLL

The outcome of an attempted maneuver is resolved by making an open-ended roll, 1-100 (see Section 2.0 for a description of "rolls"). The result of this roll is the maneuver roll.

MANEUVER BONUSES AND PENALTIES

Attempted maneuvers can be affected by various factors such as skills, armor and special equipment. Bonuses and penalties for these factors are outlined in Maneuver Modifications Table (8.2.9). The sum of these bonuses and penalties is added to the maneuver roll to determine the net maneuver roll.

MANEUVER RESULTS

The net maneuver roll is cross-indexed with the degree of difficulty on Table 8.2.2. The result is usually self-explanatory, but a percentage result (i.e., a number) can be interpreted in several ways by the GM.

- In the case of an all-or-nothing maneuver (i.e., no partial success) a second dice roll must be made. If this second roll is equal to or less than the original percentage result, then the maneuver succeeds. Otherwise, the maneuver fails.
- If a maneuver can be partially successful, then the original percentage result is the degree of success.

MANEUVER PROCEDURE SUMMARY

- 1) The character states the nature of his maneuver.
- 2) The GM assigns a degree of difficulty and any special modifications to the maneuver.
- 3) The character decides whether or not to cancel the maneuver.
- 4) If he decides not to cancel the maneuver, an open-ended maneuver roll is made.
- 5) All applicable modifications are made to the maneuver roll.
- 6) The net maneuver roll is cross-indexed with the degree of difficulty on Table 8.2.2.

Example: *Suppose a combatant attempts to leap 15 feet over a chasm 11 feet wide. The GM assigns the leap a degree of difficulty of "Medium." If the combatant does not cancel his maneuver, his roll will be modified by -10 for wearing a chain shirt (AT 13; see Table 8.2.4), by +25 for a excellent Agility, and by -10 for being wounded (over 25% of hits). He rolls a 91 for a net maneuver roll of 96 (91 - 10 + 25 - 10). Cross-indexing on Table 8.2.2, we get a result of "80". This means that the combatant has leaped 12' (15' x 80%) and therefore has crossed the chasm safely.*

If this maneuver had been to throw a rope around a rock on the other side of the chasm and the same result had been obtained, then a second dice roll would have been required. If the second roll (unmodified) was 80 or less, then the rope throw would be successful; otherwise, it would fail.

7.2 MOVEMENT

These movement guidelines can also be found in *RM* Section 7.2 in *ChL&CaL*.

This section deals with tactical movement (i.e., movement on a round by round basis) and the effects of carrying encumbering loads and the results of exertion and exposure to severe elements.

MOVEMENT (7.2.1)

A character's movement rate in a given round is based upon his Base Movement Rate (Base Rate), his Pace, and possibly a maneuver roll. A character's movement rate for a given round is obtained by multiplying the character's Base Rate by his Pace (and possibly modified by the result of a maneuver roll).

$$\text{Movement Rate} = (\text{Base Movement Rate}) \times (\text{Pace Multiplier}) \times (\text{Maneuver Roll Result} / 100)$$

The assumptions made for this movement system are: (1) a 100 Quickness for a 6' tall Common Man will result in a "world class" sprinter; and (2) the average character (Quickness 25-74) walks at 3.43 miles per hour.

BASE MOVEMENT RATE

The Base Movement Rate for an average Common Man is 50'/round. This can be modified for specific characters by a number of factors: the Quickness stat bonus, any race stat bonus modification, any armor Quickness penalty, a "stride" modification, and an encumbrance penalty. Each character should be able to calculate several standard Base Movement Rates for various situations (e.g., carrying all equipment, carrying weapons and armor only, having dropped backpack, etc.).

Quickness Stat Bonus: The chart below can be used for obtaining the Base Movement Rate due to stat alone. Simply use the character's Quickness stat; the resulting figure is the number of feet the character can move at a "walking pace" in a ten second battle round (assuming he is healthy, unencumbered, and has no armor maneuver penalty).

Quickness	Quickness Stat Bonus	Base Movement Rate
102+	+35	85'
101	+30	80'
100	+25	75'
98-99	+20	70'
95-97	+15	65'
90-94	+10	60'
75-89	+5	55'
25-74	0	50'
10-24	-5	45'
5-9	-10	40'
3-4	-15	35'
2	-20	30'
1	-25	25'

Note: Some GM's may wish to use the average Quickness and Agility when using this chart (see *ChL* Section 14.1.2).

Racial Quickness stat bonus modification: This modification is based upon a character's race (see *ChL* Section 6.2 and *ChL* Table 15.5.1) and is added directly to a character's Quickness stat bonus and thus directly to the character's Base Movement Rate.

Armor quickness penalty: This penalty can modify the Base Movement Rate, but only to the extent of canceling the Quickness stat bonus (and racial bonus). In other words, if only the Quickness stat bonus (and racial bonus) and the armor bonus penalty (see Table 8.2.4) are considered, the resulting Base Movement Rate can not fall below 50'/rnd. This factor may be partially cancelled by a character's Strength bonus (see Section 7.2.2). The Base Movement Rate can fall below 50 because of other factors such as stride, encumbrance, etc.

Stride Modification: The Base Movement Rate is also modified for a character's length of stride. This factor should be used whenever racial adjustments are employed, for shorter beings (e.g., Halflings) often have large Quickness bonuses and will move disproportionately fast considering their short strides. For purposes of this rule, simply note that the stride of the average 6' person is used as the norm; every 6" difference will result in an add or subtraction of 5. One of the following **stride modifications** is added to the Base Movement Rate:

Height	Modification Due to Stride
7'10" — 8'3"	+20
7'4" — 7'9"	+15
6'10" — 7'3"	+10
6'4" — 6'9"	+5
5'10" — 6'3"	0
5'4" — 5'9"	-5
4'10" — 5'3"	-10
4'4" — 4'9"	-15
3'10" — 4'3"	-20
3'4" — 3'9"	-25
2'10" — 3'3"	-30
2'4" — 2'9"	-35
1'10" — 2'3"	-40

Encumbrance Penalty: A character's Base Movement Rate may be reduced due to the amount of weight he carries. This factor is discussed in the next section (7.2.2).

PACE

Each round a character must decide the Pace at which he wishes to move. This Pace has three effects on actions during that round:

- Determines the movement rate (pace multiplier x Base Movement Rate)
- Determines the difficulty of any movement maneuver required
- Determines how many "exhaustion points" are expended (see Section 7.2.3).

The following chart summarizes those effects:

Pace	Pace Multiplier	Normal Maneuver Difficulty	Exhaustion Point Cost/Rnd
Walk	1x	none	1 every 30 rnds
Fast Walk/Jog	1.5x	routine	1 every 6 rnds
Run	2x	easy	1 every 2 rnds
Sprint/Fast Run	3x	light	5/rnd
Fast Sprint	4x	medium	25/rnd
Dash	5x	hard	40/rnd

Encumbering loads (see Section 7.2.2) and armor will prevent anyone from reaching certain speeds (regardless of their bonuses). A super character with racial adds to his +25 bonuses for Quickness and Strength may move quite far walking even while burdened with armor and a heavy load. Nonetheless, he could not move at either a "Fast Sprint" or "Dash" rate (depending upon his armor). The following prohibitions apply:

PACE LIMITATIONS CHART

Penalty	Prohibited Pace
Armor Qu Penalties -10 to -15	Dash
Armor Qu Penalties -16 to -45	Dash, Fast Sprint
Armor Qu Penalties -46 plus Up to 2x Wt. Allowance	Dash, Fast Sprint, Sprint
From 2x up to 4x Wt. Allowance	None
From 4x up to 6x Wt. Allowance	Dash
6x Wt. Allowance and up	Dash, Fast Sprint, Sprint

MOVEMENT MANEUVERS

Use the maneuver chart for movement under pressure. Where an individual or group is "under pressure" from attackers, the weather, or some other perceived threat — or time is a major factor — have him/them roll on the Maneuver/Movement Table 8.2.2. Simply determine the appropriate difficulty (from the Pace Chart, or by GM assignment); the result is the percentage of the distance they would normally move given their rate of speed. It is possible to move faster than normal due to this process.

Example: *Bandring is fleeing from the dreaded Malevolent Moose. He has a Base Movement Rate of 60'rnd, he is running, and thus he would normally move 120' per round. Due to the pressure of the chase, however, the GM asks him to roll on the Maneuver/Movement Table. Bandring knows the terrain, so the difficulty is "Easy" (see Pace Chart). Bandring rolls an adjusted D100 and the result is '100'. He moves the full 120 feet. Had he rolled lower and gotten a '50' result, he would move but 60' that round. Had the chase been at night a higher difficulty category may have been applicable.*

ENCUMBRANCE (7.2.2)

The problems associated with wearing armor and other coverings ("non-dead" weight) are covered elsewhere (see the Maneuver/Movement Table 8.2.2 and the Armor Table 8.2.4). Here we are dealing with "dead weight," that which one carries rather than wears. The encumbrance penalties discussed here apply to the Base Movement Rate (see Section 7.2.1).

Basically, each character has a "weight allowance" equal to 10% of his own weight. If he is carrying dead weight less than or equal to his weight allowance, he has no encumbrance penalty. A character's encumbrance penalty is based upon the number of increments of "weight allowance" that the dead weight consists of (see chart below). A character's Strength stat bonus may cancel some or all of his encumbrance penalty.

The following steps should be taken to calculate encumbrance penalties:

- 1) Calculate the normal body weight for the character.
- 2) Calculate the character's weight allowance (10% of his weight).
- 3) Determine how much "dead weight" (in pounds) the character is carrying; this is his "load."
- 3) Divide the load by the weight allowance.
- 4) Determine the encumbrance penalty using the chart below.

ENCUMBRANCE CHART

Number of weight allowance units in load		Encumbrance Penalty
More Than	Less Than or Equal to	
0x	1x	0
1x	2x	-10
2x	3x	-20
3x	4x	-25
4x	5x	-30
5x	6x	-35
6x	7x	-40
7x	8x	-50
8x	9x	-60
9x	10x	-70
10x	11x	-80
11x	12x	-90
12x	13x	-100
13x	14x	-110
14x and up		-120

Strength Stat Bonus: Once a character has determined his encumbrance penalty, his Strength stat bonus may be used to cancel all or part of this penalty (see Section 5.2.2). If his Strength stat bonus is greater than his encumbrance penalty, the difference may be used to cancel all or part of the character's armor Quickness penalty (see Section 7.2.1).

EXHAUSTION (7.2.3)

Movement under extreme conditions, in rough terrain, and/or at accelerated rates will increase fatigue. For this reason we include rules for exhaustion at this point. We also include provisions for exhaustion due to melee and bow fire.

Each person has a base number of exhaustion points equal to his Constitution stat. This is the number of points he can expend before he has to rest and/or recuperate. (e.g., when fully rested a character with a Constitution of 90 would have 90 exhaustion points). Characters who have used all of their exhaustion points are at -100 to all activities and must rest. Expended exhaustion points may be recovered at a rate of one per round rested.

Exhaustion due to Pace: Each round that a character moves he expends exhaustion points at a rate determined by his Pace. This rate ranges from 1 every 30 rounds for a Walking Pace to 40 per round for a Dash Pace. These rates are listed in the Pace Chart in Section 7.2.1. A character without sufficient exhaustion points to complete a full round at a given pace cannot travel at that rate of speed.

Example: An unencumbered Bandring travels 50' per round (i.e., his Base Movement Rate is 50) when walking. His Constitution is 90 and he can walk for 2700 rounds (450 minutes) without a rest but he would be totally exhausted thereafter. If he were to sprint he could move at a rate of 150' per round; but he would exhaust his 90 exhaustion points in 18 rounds (3 minutes) at that pace (5/round x 18 rounds = 90). If Bandring were moving in a breastplate and with a 3x weight allowance load, his Base Movement Rate would be reduced to 20' per round and he would have to "Sprint" (and exhaust himself as indicated) in order to cover 60' per round.

Exhaustion and Combat: When fighting, a character necessarily expends more energy than he would while walking. Thus, the following expenditures should apply.

COMBAT EXHAUSTION CHART	
Character's Situation	Exhaustion Point Expenditure
Melee	1 every 2 rnds
Missile Fire	1 every 6 rnds
Concentration	1 every 6 rnds

Exhaustion modifiers: The following factors may affect the way a character expends exhaustion points. They provide detail, but may be considered optional. Only one modifier of a given type should be applied (e.g., one temperature mod., one terrain mod., one time without sleep mod.).

SUMMARY (7.2.4)

Base Movement Rate = 50 feet per round

- + Quickness stat bonus (see Section 7.2.1)
- + race Quickness stat bonus (see ChL Table 15.5.1)
- + stride modification (see Section 7.2.1)
- + encumbrance penalty (see Section 7.2.2)
- + armor Qu penalty (see Table 8.2.4)
- + Strength bonus (only cancels previous 2 modifications)

Example: Bandring is a High Man (race Quickness stat bonus of -5) with a Quickness of 90 (stat bonus of +10). He is 6'7" tall so his stride modification is +5. His weight is 220 pounds and he is carrying 27 pounds of dead weight; thus his encumbrance penalty is -10, since 27 lb. is between 1x and 2x his weight allowance of 22 lb. (10% of his weight of 220). His Strength of 85 (bonus +5) plus his race ST stat bonus (+10) will cancel this encumbrance penalty, but it will not add anything to the Base Maneuver Rate. Bandring wears AT 14 with a standard Quickness Penalty of -10. This armor penalty is reduced to -5, since 5 of this penalty is canceled by his Strength bonus of +15 and because his encumbrance penalty was only -10. His armor QU penalty can never exceed -5 because his total QU bonus is only +5.

So his Base Movement Rate is:

- 55 = 50 (standard movement rate) + 5 (stride modification)
- +10 (Qu stat bonus) -5 (race Qu stat bonus)
- 10 (encumbrance penalty) -10 (armor penalty)
- +5 (St stat bonus) +10 (race St stat bonus)

MOVEMENT PROCESS SUMMARY

- 1) Determine current Base Movement Rate (see above).
- 2) Determine Pace (check restrictions).
- 3) Movement Rate / round = (Base Movement Rate) x (Pace multiplier).
- 4) If pressure situation, make a maneuver roll (Section 7.2.1).
- 5) Expend exhaustion points (Section 7.2.4).

ARMS LAW TABLES

All of the *AL&CL* tables are grouped together by type: i.e., all critical tables together, all attack tables together, etc. In addition, all of the tables are found in back of this product for ease of use. The original numbering scheme is maintained because most ICE products refer to these tables by the original numbering scheme.

In order to help alleviate some of the problems caused by this organization, we have provided a Table Index on page 95 and a Table of Contents on pages 2 and 3. In addition to the following listing provides page numbers for all of the *Arms Law* tables.

OPTIONAL RULES

This section provides some optional rules for use with *AL&CL*. They can provide more flexibility and detail within the framework of the basic rules. However, they can involve complications and additional bookkeeping. A GM should examine these rules and determine which ones are appropriate for the pace, flavor, and detail he wishes to inject into his game.

9.1 CHANGING TARGETS

In certain circumstances in which a character changes targets, he may take an OB mod against this target for one attack. In all cases, the character must be aware of the new target in order to face it.

In Fire Phase (A): If the firer attacked a target in Fire Phase (B) of the previous round and/or the Melee Phase of the previous round, he must take a -20 mod to his attack if the new target is 0° to 90° from the previous target or a -40 mod to his attack if the change is 91° to 180°.

In Fire Phase (B): If a character fired at a target in Fire Phase (A), he must take a -20 mod to his attack if the new target is 0° to 90° from the previous target or a -40 mod to his attack if the change is 91° to 180°.

In Melee Phase: If a character fired at a target in Fire Phase (A), he must take a -20 mod to his attack if the new target is 0° to 90° from the previous target or a -40 mod to his attack if the change is 91° to 180°.

In Melee Phase: If a character fired at a target in Fire Phase (B), the new target must be within 0° to 90° of the previous target and the character takes a -30 mod to his attack. If the change is 91° to 180°, the character will be unable to melee the new target, but he can change the target's attack (if any) to a flank attack instead of a rear attack.

9.2 MISSILE WEAPONS IN MELEE

In general, missile weapons cannot be used while engaged in melee. However, a GM may allow a relatively small one-handed weapon (e.g., a thrown dagger) to be thrown in melee in certain situations. The potential firer must be able to make a normal melee attack (e.g., may not have performed earlier actions that would prohibit him from making a melee attack).

In such a case, the thrower's opponent should make his melee attack first. Then the thrower should make a maneuver roll to see if he can throw. If successful, the thrower would then be allowed to throw his weapon. If this maneuver is attempted, the character may not make his normal melee attack.

9.3 FIRE WHILE MOVING

A character using a missile (or thrown) weapon that performs no other actions in a round has the option of combining his movement with Fire Phase (B). In this way, the combatant may move up to 50% of his normal movement allowance, and fire during movement at -50 to his attack. A GM should require a maneuver roll for this action. (e.g., If the character fails the roll, he may only get part of the way through his movement, or perhaps not be allowed to fire.)

Note: *Opponents on "opportunity fire" would have the option of firing at a character attempting such a maneuver before he would fire at them.*

9.4 RELOADING

A character may attempt a maneuver to reload his weapon during any Movement/Maneuver Phase. The percentage of normal activity that is required varies for different weapons from 30% to 300% or more. Each type of reload has a required activity percentage. These "reload times" differs from those in Section 5.2.12 but the effects in play are approximately the same. For consistency, the *Space Master* reload times are given for clips, belts, packs, etc.

If the activity % required cannot be completed during a single Movement/Maneuver Phase then it may be continued in the Movement/Maneuver Phase of the next round (e.g., if reloading takes 150% activity, it will take at least one full round and half the activity of another round to complete). If any other action is taken during a reloading maneuver, the reloading is canceled and must be restarted from scratch.

Option 1: A GM may allow a character to reduce the required % activity for a reload by up to 30% of normal activity by taking a OB penalty for his next fire attack. The OB penalty is equal to the activity reduction (e.g., a reduction in reload time of 20% of normal activity would result in a -20 OB mod). For bows and slings, this option closely reflects the standard reload rules.

Option 2: A GM may allow a character to make a maneuver roll to attempt to reload in less than the required time. We suggest that the minimum reload time be no less than half the normal amount. For example, a reload in 50% of the normal time would be a Extremely Hard maneuver, in 75% of the normal time would be a Hard maneuver, etc.

TYPE OF RELOAD	% ACTIVITY
Bow Ammo:	
Short Bow	60
Composite Bow	70
Long Bow	80
Light Crossbow	170
Heavy Crossbow	230
Miscellaneous:	
Sling	50
Drawing a Weapon	20
Sheathing a Weapon	30
Picking up a Weapon	40
Changing Weapons	50
Shift Weapon to Other Hand	10
Projectiles (e.g., a shot from a gun):	
Single Shot	30
Clip	50
Belt	100
Energy Power Supplies:	
Cell	50
Cartridge	75
Pack	100

9.5 CHANCE FOR INITIATIVE DETERMINATION

If a GM wishes to make initiative determination a little less deterministic, he can have each combatant roll 2D10 and add the result to his initiative point total (see Section 6.1). To make this factor less important, only roll 1D10; to make it more important, use more dice.

9.6 SHIELD BASH

When using this optional rule, a character may use his shield to attack (called a "shield bash"). This attack is treated as a Small (or possibly Medium) "Bash" attack (Table 11.1.6). If using skill development for expertise, skill with this attack must be developed separately from the weapon used in the right hand and all of the two weapon rules (see Section 5.1) apply.

9.7 WEAPON BONUSES FOR MISSILE WEAPONS

Section 5.2.4 states that weapon bonuses for a bow and an arrow are averaged to obtain the weapon quality bonus for OB calculations. This section presents two other options:

Option 1: Very Generous — Apply both weapon bonuses. GMs should handle this option carefully, it can lead to large missile OBs.

Option 2: Very Conservative — The weapon quality bonus for a bow and arrow attack is the smaller of the bow bonus and the arrow bonus. For example, a +15 bow firing a +5 arrow only gives a +5 bonus to the attack's OB.

9.8 OPTIONAL ARMOR DAMAGE RULE

A GM should be careful when deciding whether or not to use this optional rule. It does add quite a bit of record keeping.

Armor can take a certain total number of "points of damage" before it falls apart; we will call this total the armor's endurance. A set of armor's endurance is equal to (50 x the armor's type) plus (20 times the armor's DB). Thus a +10 chain hauberk (AT 16) would have an endurance of 1000 = (50 x AT 16) + (20 x (+10 DB)).

Armor damage is determined by damage taken by the character wearing the armor. Each hit taken by the character is 1 point of armor damage, an 'A' crit causes 10 pts, a 'B' crit causes 20 pts, a 'C' crit causes 30 pts, a 'D' crit causes 40 pts, and an 'E' crit causes 50 pts. Due to normal wear and tear, armor receives 2 points of damage for every week (or portion of a week) that it is worn.

The amount of damage that a set of armor has taken can cause an increase in the severity of critical taken by the wearer. If the damage taken totals 0%-19% (round off) of the armor's endurance the severity of any crits is not affected. Between 20% and 39% the severity of any crits is increased by one to a maximum severity of 'E' (i.e., A's become B's, B's become C's, C's become D's, D's become E's, E's are unaffected). Between 40% and 59% severity is increased by 2, between 60% and 79% severity is increased by 3, and between 80% and 99% severity is increased by 4. For example if a set of armor has taken damage equivalent 45% of its endurance, A's become C's, B's become D's, and C's, D's, and E's are become E's. Certain animal attack criticals can become F's.

If the total damage taken by a set of armor is less than or equal to 20%, a character may repair it himself at a rate of 1% for each 2 hours spent. We suggest a cost of materials of 1% of the armor's cost for each 10% of damage repaired. If the total damage taken is over 20% a special craftsman and equipment is required for repairs. The craftsman and equipment must be appropriate for the type of material involved; normally a smith for standard metal armor and a leather-worker for standard leather armor. We suggest a time requirement of 1 day per 10% repaired, and a cost of 1% of the armor's cost for each 2% of damage repaired. For damage above 60% we suggest 1 day per 5% repaired and a cost of 3% of the armor's cost for each 2% of damage repaired. These prices are based upon the normal price for a standard set of that type of armor. A GM may wish to make allowances for special or magical armor.

For characters with "smithing" or "leather-working" skill access to proper equipment and material should be required. In addition, the character should have to make a maneuver roll each day to see if his repair attempts have been successful.

9.9 BARE HAND ATTACKS

If a character without martial arts training wishes to attack a foe with his bare hands, he may use:

- A Martial Arts Striking attack (Rank 1) that only delivers Unbalance criticals, or
- A MA Sweeps & Throws attack (Rank 1) that only delivers Grapple criticals

The Striking attack represents striking the foe with his fists, while the Sweeps & Throws critical represents an attempt to grapple or wrestle the foe. In either case, if the character is untrained in an unarmed combat technique (e.g., boxing, wrestling, karate, etc.), the attack receives a -25 skill bonus in addition to the normal OB modifications.

See Section 10.3 for some non-*RM* guidelines for unarmed combat and the use of the martial arts tables.

9.10 ADDITIONAL EFFECTS OF "STUN" ROUNDS

A combatant's *total hit points* is the number of hits he can take without becoming unconscious (see *ChL* Section 3.8). A combatant will lose consciousness if his total number of accumulated rounds of "stuns" exceeds:

$$\beta = 5 + [\text{the combatant's total hit points} \div 10] \quad (\text{round off})$$

If not unconscious due to some other cause, a combatant will regain consciousness when his total accumulated rounds of "stuns" becomes less than β above.

Example: *Coma (often called the "Dwarven Punching Bag") "trips" and falls into an open pit. The fall does not hurt him, but the sudden stop on the solid rock at the bottom delivers two B-severity Krush criticals. In addition, the sharpened spikes someone carelessly left imbedded the bottom deliver five A-severity puncture criticals. Coma is lucky, the criticals do not do any significant damage (just a bunch of hits); however, the total number of stun rounds from the seven criticals is 17. Since Coma's can take 77 hits before passing out, he passes out if his stun round total exceeds 13 (= 5 + (77 ÷ 10)) rounds of stun. Thus Coma is unconscious. If nothing else happens to him, he will regain consciousness in 4 rounds (= 17 - 13).*

NON-ROLEMASTER GM GUIDELINES

10.1 HEALING GUIDELINES

A GM should develop a comprehensive healing system for his world. This is a factor that controls how many and how often characters die permanently and how long they are out of commission healing.

HEALING SPELLS

In a campaign game, the GM may want to make healing spells available in towns and cities. The GM should experiment with costs and requirements for healing services. This could range from spell users requiring only money for their services to spell users who will only heal "true believers" of their religion (or race). A complete set of healing spells is provided in *Spell Law* for healing by a variety of professions.

HEALING HERBS

One of the prime ingredients of a healing system is herbs (drugs). Herbs may be used to simulate the effects of certain spells in performing miraculous cures, are portable, and are usually much more available than high level healers. The GM can experiment with the numbers, prices and effects of whatever herbs he feels are necessary in his game. On the previous page we present an example some herbs found in one area of a fantasy world; other drugs might be available in other areas.

NATURAL HEALING

We suggest that concussion hits heal at a rate of 1 each hour if resting, and every 3 hours if active.

The Healing Recovery Chart provided in this section gives the recovery time for a variety of injuries.

EFFECTS OF INJURIES

Another key factor in a healing system is the effect of the wound after being cured (by spells or herbs); some considerations in this area are: how long does it take to recover? should there be any permanent damage (often reflected in a lowering of stats)? what effect would the wound have on the character while he is recovering? Most of these questions are very subjective and must be decided on a case to case basis. For example, having an arm cut off and then reattached might cause a loss of agility (temporary or permanent) and maybe a scar. Death and being raised from the dead might cause a general loss of abilities, partial loss of experience, and scars. Due to the variety of character systems which exist, these elements will not be detailed in *AL&CL*.

HEALING RECOVERY CHART

This chart provides recovery times for most general injuries. When using it, apply the character's Constitution bonus to any roll. The result is the recovery time for light injuries. Multiply the figure by 5 for medium injuries and by 10 for severe injuries. Halve the recovery time if the victim is hospitalized or placed in some other special care.

ROLL	TYPE OF DAMAGE (in days)						Muscle/ Tendon
	Burn	Bone	Tissue	Head	Organ		
01-15	3	5	3	10	9	7	
16-35	2	3	2	7	6	4	
36-65	2	2	1	5	4	3	
66-90	1	1	1	3	3	2	
91+	1	1	1	2	2	1	

10.2 AD&D® CONVERSION NOTES

Since AD&D® (see the * note at the end of this section) is the role playing game that most people are familiar with, we will present some conversion notes as an example of how *AL&CL* can be used with another FRP system.

To use *AL&CL* as a combat system with AD&D® substitute the *AL&CL* attack tables for the AD&D® Hit & Damage Procedure.

TO HIT

Each +1 bonus in the AD&D® system gives a bonus of +5 to *AL&CL* OBs.

DAMAGE BONUSES

Each +1 damage bonus gives a +1 bonus to *AL&CL* OBs. The damage bonus is **not** added to the damage given.

LEVEL ADDS

Fighters should be given a +5/level bonus to their OBs, clerics +3 or +4/level, thieves +2 or +3/level, and magic users +1/level.

WEAPON PROFICIENCY

In order to incorporate expertise in weapons into AD&D® use weapon proficiency picks. Allow multiple picks for a single weapon, with each pick increasing the OB with that weapon by +5. A weapon used with no proficiency pick has an OB mod of -25.

INITIATIVE POINTS

Use the Table 8.2.8 normally. Convert 3-18 stats to 1-100 by multiplying by 5 and adding 5 to the total (result 20-95, average 55-60). It is important that quickness or dexterity be expressed in terms of a 1-100 (or equivalent) range, because the other figures are based on the assumption that stats range between 1 and 100.

STAT BONUSES

Use the Chart provided in Section 5.2.2.

DEFENSIVE BONUSES

Determine the *AL&CL* armor type by comparing the physical composition of the armor with the *AL&CL* armor descriptions given in Section 4.1. Bonuses for Armor, Dexterity, Spells, Bracers, etc. do not shift the armor type column. Instead, each +1 under AD&D® rules gives a defensive bonus of +5.

Example: +2 breastplate and greaves (under AD&D®: AC 3 (+2) = AC1); using *AL&CL*, the armor is AT 18, with a -10 bonus to the wearer's DB.

HIT POINTS

AL&CL is designed for a system in which a normal fighter will take almost 100 hits by 10th level. Since the average for AD&D® is about 50, we suggest that you halve hits given under *AL&CL* when using it with AD&D® (round down if you are generous).

GENERAL

For conversion to any system, remember: the effectiveness, flexibility, and power of an attack is entirely contained within the offensive bonus of an attacker. So the offensive bonus should represent the potential of the attacker for inflicting damage.

10.3 MARTIAL ARTS GUIDELINES

If you use the complete *Rolemaster* system, ignore this section. It is intended for GMs that use other systems.

MARTIAL ARTS IN GENERAL

In *AL&CL*, the martial arts rules have been designed to maximize playability while maintaining as many facets of real martial arts as possible. The Martial Arts Combat Summary Chart gives the combat capabilities of a sample of the martial arts existing in our world. Any other capabilities of martial artists are dependent upon the character system being used. Combat capabilities are described in terms of 2 attack tables and 2 critical tables devoted to martial arts. All normal *AL&CL* combat rules apply — unless they are specifically superceded by the guidelines provided in this section.

THE MARTIAL ARTS "FORMS"

The martial arts forms given are broad generic classifications and represent no specific style. The GM may modify any or all of the statistics given to simulate a specific martial art form. The forms given are primarily intended to provide an example of how the system can be used.

We suggest that any player-character wishing to run a martial artist (warrior monk) be allowed to choose (or be assigned) one of the forms given. The fantasy role player level values (experience or skill level) would determine the rate of progression of combat capabilities. Level capabilities that are not given can be easily extrapolated. It is suggested the non-trained characters be treated as novice boxers and novice wrestlers.

Kung Fu is the source of most martial art forms (it has no belt system, but belts are included for comparison purposes). Kung Fu requires spiritual and mental training as well as physical training and thus the stats given are superior to the other forms (Kung Fu progresses equally in striking and sweeps and throws). It is suggested that characters wishing to be Kung Fu martial artists be given certain restrictions. Suggested restrictions include:

- 1) a background (youth) spent in a religious order or retreat;
- 2) a specific mission in life due to the background;
- 3) personal enemies due to affiliation with the religion; and/or
- 4) a very, very strict alignment of good (or evil).

MARTIAL ARTS OBS

The OBs given on the Martial Arts Combat Summary Chart include bonuses for expertise and level, but not for personal characteristics (strength, agility, etc.). A GM should examine the normal *AL&CL* offensive bonuses of his standard characters and compare them to the stats given. If there is a large difference, merely reduce the offensive bonuses given by 25-50%. The stats given are those obtained when using ICE's character development system.

INCREASED INITIATIVE POINTS

Only martial artists may use part of their offensive bonus to increase their first strike points (see Section 6.1). For every 5 points that the martial artist decreases his offensive bonus by, his initiative total is increased by 10 points. This reflects a martial artist's capacity to focus his attack upon a very fast lethal blow.

MULTIPLE ATTACKS AGAINST THE SAME FOE

Certain Martial artists may make two attacks against the same foe in one round (if "Speeded" or "Hasted" a martial artist can make 4 attacks). Factor #1 following an OB on the Martial Arts Combat Summary Chart indicated the number of allowable attacks against the same foe. If this factor is not given for a given MA rank, the martial artist may not make multiple attacks against the same foe with that MA rank.

To make multiple attacks, the martial artist must decrease his OB by 30, he must split his OB between attack and parry in the same manner for both attacks, and he must be using Martial Arts.

Example: *Syr-istor (Black Belt, 3rd D., Japanese) has a +100 OB in MA Striking Rank 1 ("100 2/3/180") and chooses to attack Argund twice in one round. Because he is striking twice in the same round, he subtracts 30 from the OB applied to each attack (i.e., he makes two +70 MA Striking Rank 2 attacks). Of course, he may use part of his OB to parry, and he still has the option of only attacking once at +100.*

ENGAGING MULTIPLE FOES

Only martial artists can engage multiple foes in the same round of combat, without using special abilities or aid from spells (e.g., "Speed", "Haste", etc.). Factors #2 and #3 following an OB on the Martial Arts Combat Summary Chart indicated the number of allowable foes and the maximum allowable angle of separation of these foes. If these factors are not given for a given MA rank, the martial artist may not engage multiple foes with that MA rank. To engage multiple foes, a martial artist must be using martial arts (unarmed combat) and he must subtract 20 from his OB for each foe engaged. He must also allocate his remaining OB between attack and parry in the same manner against all foes engaged.

Example: *Vemtar (Black Belt, 2nd D., Korean) has a +80 OB in MA Striking Rank 1 and is fighting two foes. He can attack one with his full +80 OB or both with a +60 OB against each (80 - 20). Since the chart indicates he can engage 2 foes within 180° ("80 1/2/180°"), he can fight the two foes regardless of their angle of separation (e.g., even against one frontal and one rear attacker).*

INTERPRETING THE MARTIAL ARTS COMBAT SUMMARY CHART

The example below shows how the combat statistics can be interpreted using the guidelines above and the key found at the bottom of the Martial Arts Combat Summary Chart.

Example: *Consider a martial artist with a 3rd degree black belt in Japanese style karate. His DB of 60 applies to all foes that he is aware of. This example ignores weapon Kata.*

He could choose to fight using any one of his 8 rank abilities (4 striking, 4 sweeps and throws), or he could attempt to grapple with an offensive bonus (OB) of 50 (maximum result on the Grapple attack table of Small).

- With **striking rank 4** and **all four sweeps and throws ranks**, he could only fight one target per round with the OB given.
- However, with **striking rank 3**, he could:
 - 1) Fight 1 foe with a 70 OB, or
 - 2) Fight 2 foes (within a 90° arc) with a 50 (=70-20) OB against each.
- With **striking rank 2** he could:
 - 1) Fight 1 foe with an 85 OB, or
 - 2) Fight 2 foes with a 65 (=85-20) OB against each.
- With **striking rank 1** he could:
 - 1) Fight 1 foe with a 100 OB (1 attack), or
 - 2) Fight 1 foe with a 70 (=100-30) OB (2 attacks), or
 - 3) Fight 2 foes with an 80 (=100-20) OB (1 attack each), or
 - 4) Fight 3 foes with a 60 (=100-20-20) OB (1 attack each).

EFFECT OF WEAPON KATA

Certain martial artists use weapons as part of their *Kata* (kata are patterns of attack and defense that form the basis for the various forms of martial arts). Weapon kata may be used if a -20 modification is made to the OB of the particular rank being used. Normal martial arts weapons include knives (daggers), jo sticks, nunchakus, tonfas, various swords, and other exotic weapons. A GM may wish to limit which types of weapons may be used and at which level of development in martial arts training their use should begin.

It is suggested that knife kata be allowed at striking ranks with an offensive bonus (OB) of at least 50, and stick kata be allowed for sweeps and throws ranks with an OB of at least 50. It is further suggested that each martial artist be allowed to pick two other appropriate weapon kata that can be utilized by a rank that has an OB of 90 or more.

A weapon kata attack is resolved in the following manner:

- 1) A normal attack is conducted on the appropriate martial arts attack table (striking or sweeps and throw). A OB modification of -20 is applied.
- 2) The weapon being used may be fumbled as specified in Section 6.2-6.3. However, the fumble range is decreased by 1 for each increment of 10 that the OB is over 50 (round down and the range can never be reduced below 2).
- 3) The number of concussion hits indicated on the martial arts attack table is increased by: the difference between the maximum number of hits the weapon can give [to the armor type (AT) being attacked] and the maximum number of hits that can be given to the AT being attacked by the martial arts attack table being used. The result is the actual number of concussion hits inflicted by the weapon kata.

Kata Hits Delivered = normal MA hits +
(Max Weap. Hits vs. that AT) - (Max MA Hits vs. that AT)

- 4) In addition to the normal (if any) critical strike indicated by the martial arts attack table, a weapon kata also inflicts a second critical of one severity level less [e.g., a result of C on the martial arts (m.a.) striking attack table would also inflict a B Slash (or Puncture) critical if a knife were used]. **Important:** Only one die roll is made to resolve both criticals. The type of extra critical is always Unbalancing for sweeps and throw for weapons kata, while the extra critical type can be Slash, Puncture, or Krush for striking weapon kata. If more than one type of critical is appropriate for a given striking weapon kata, the attacker should choose which is to be applied — before the attack roll.

Example: *Consider a martial artist with a rank 1 striking OB of 110. He decides to use a weapon kata utilizing a morning star against a foe with an armor type (AT) of 9(-30). His OB is reduced to 90 (110-20) due to using a weapon kata (-20) found on Offensive Bonus Modification Chart). A morning star normally fumbles on 01-08; but his OB is 40 more than 50, so he would only fumble on an attack roll of 01-04.*

He makes an attack roll of 45, thus his net attack roll is 45 (attack roll) + 90 (OB) - 30 (defender's DB) = 105. If he had made a higher attack roll, it would not have changed the result because the maximum result for a rank 1 attack is 105. The result from the martial arts striking attack table is "10B."

The maximum number of concussion hits that a morning star can inflict upon AT 9 is 27, the maximum for a MA striking attack against AT 9 is 19; so the actual number of concussion hits inflicted is 18 (=10+27-19).

The critical damage is a 'B' martial arts Striking critical and an 'A' Krush critical are applied to the defender. Thus, if the martial artist rolled a critical result of 52; the 'B' MA Striking critical would stun the foe for 1 round and inflict 6 concussion hits, while the 'A' Krush critical would force a parry at -25 for one round and inflict 5 more concussion hits.

The grand total of damage would be: 29 (=18+6+5) hits, stunned one round, and forced to parry at -25 the next round (the worst damage inflicted is applied first).

MA OFFENSIVE BONUS MODIFICATIONS (CUMULATIVE)

- 20 For each foe over 1 engaged during a given round.
- 30 For using two attacks versus one foe in a given round.
- 20 For using a weapon kata.

Form: The style of martial arts as it is known in our world today. This is a very general, generic classification.

Belt/Degree: Ranking in the particular style.

FRP Level: Fantasy Role Playing Level; the equivalent level of an average character with these abilities (useful for resistance rolls and player characters).

DB: Defensive Bonus; defined in Arms Law rules. Applies to all attackers that the martial artist is aware of.

Rank #: Rank # limits the maximum possible result on the attack table used. Rank statistics for striking use the Martial Arts Striking attack table. Rank statistics for sweeps and throws use the Martial Arts Sweeps and Throws Attack Table. The ranks represent increasingly complex and deadly forms of attack.

Grapple: Statistics of handling grappling or wrestling a foe (can be used for subdual).

S, M, or L: The maximum result allowed on the Grapple/Envelop attack table (i.e. Small, Medium, or Large).

#: Offensive Bonus when grappling.

OB #1/#2/#3: See Section 10.3. Each rank one set of these combat statistics; each round the combatant must choose one of these sets of statistics to use. If #1, #2, and #3 are left out they are assumed to be "1/1/—".

OB: The Offensive Bonus (OB). The OB can be used for parry or attack or part on both. However, the same proportions must be used on attack and parry for all foes fought and all attacks made.

#1: The number of attacks which may be made against one target in a given round (if two attacks are made against the same target the OB for both attacks is decreased by 30).

#2: The number of different foes which can be attacked in a given round (the OB is decreased by 20 for each foe over 1 engaged).

#3: The maximum allowed angle of separation for different foes engaged in a given round (i.e., 90° means all foes must be within an arc of 90°, 180° means all foes engaged can be in any relative position around the martial artist). Of course, all foes must be adjacent to the martial artist.

ARMOR MOD.: Modifications to the attack roll based upon the armor of the defender.

Special: Varies for each weapon.

CLAW LAW TABLES

All of the *AL&CL* tables are grouped together by type: i.e., all critical tables together, all attack tables together, etc. In addition, all of the tables are found in back of this product for ease of use. The original numbering scheme is maintained because most ICE products refer to these tables by the original numbering scheme.

In order to help alleviate some of the problems caused by this organization, we have provided a Table Index on page 95 and a Table of Contents on pages 2 and 3. In addition the following listing provides page numbers for all of the *Claw Law* tables.

ADDITIONAL WEAPON STATISTICS

The weapons given in the historical section of the Weapon Statistics Chart are historical weapons that have actually been made and used in our world. The statistics given are suggested values for their use with *AL&CL*. They indicate which *Arms Law* attack tables to use and what modifications to make. These weapons are intended to be examples of how to use the *AL&CL* system to simulate any weapon.

The weapons in the fantasy section of the Weapon Statistics Chart are fantasy (made up) weapons. They are very powerful and depend on special design and material. They are included to illustrate how you can make up your own weapons using this system.

ANIMAL AND MONSTER STATISTICS

The animals statistics given in the Animal Statistics Chart are for animals that have actually existed on our world. The statistics given are suggested values for their use with *AL&CL*. They indicate which *AL&CL* attack tables to use and what modifications to make. These animals are intended to be examples of how to use the *AL&CL* system to simulate any animal.

The creatures in the Monster Statistics Chart are fantasy (made up) creatures. They are very powerful; and their use in play often depends on special abilities and the world system being used. They are included to illustrate how you can make up your own monsters using this system.

GMs that want more complete creature descriptions (for animals and monsters) should refer to ICE's *Creatures & Treasures* (see Section 1.1). *C&T* provides complete descriptions for over 500 animals, races, fantastic beasts.

Note: The *OBs* and *DBs* given to monsters and animals are based upon normal *Rolemaster* values. In these systems, a fighter can have an offensive bonus as high as 80 to 90 at around 5th level. For use with other systems, the *OBs* and *DBs* given should be examined for their relation to character bonuses. It may be that the bonuses given should be cut to between 50-70% for some systems.

13.1 ANIMAL STATISTICS

Most animals will rarely attack a human unless they or their young are threatened. When an attack does occur, however, it is often sudden and ferocious. The ferocity of animal attacks is reflected to a certain degree by the ten animal attack tables found in *Claw Law*. Some of these tables make huge animals more terrible than the most fearsome weapon in *Arms Law*. The comparative ferocity and prowess of animals is subject to the value judgements of the GM.

The Animal Statistics Chart provides some suggested combat capabilities for common earthly animals using the animal attack charts. Only the broad physical characteristics are presented. The tactical application of the animals' characteristics (as well as any unusual abilities) should be developed by the GM.

13.2 MONSTER STATISTICS

A sample of commonly used fantasy monsters is provided on the Monster Statistics Chart. *AL&CL* only provide the Combat capabilities of the listed monsters. Any special abilities (fire-breathing, invisibility, flying, etc.) must be provided by whatever spell and ability system you use in your game.

13.3 DETERMINING THE TYPE OF ATTACK

Each animal described on the Animal Statistics Chart has at least one type of attack and possibly as many as three (Primary, Secondary, and Tertiary). To determine which attack is used, roll percentile dice (1-100). Low (and in the given percent range, the last number) indicates that the primary attack is used while the higher rolls indicate secondary and possibly tertiary attacks.

The GM may always change the given pattern of attack for a given animal or situation; the provided values are only meant to be guidelines for the use of the *Claw Law* tables.

Example: *Examine the Wolverine entry. On a roll of 1-40 the wolverine will use the Bite Attack Table (11.1.2) with an offensive bonus of 50 and a Maximum result of Medium (M). On a roll of 41-50, the wolverine will use the Claw/Talon Attack Table (11.1.3) with an OB of 45 and a Maximum result of Medium. On a roll of 51-100, the Wolverine will make both of the attacks just mentioned.*

An attack marked with a « or √ can as a result of another attack by the same animal has already obtained a critical strike this round.

« — If the attack given on the left (i.e., the primary attack for a secondary attack or the secondary attack for a tertiary attack) has obtained a non-Tiny critical this round, then this attack occurs in the same round.

√ — If the attack given on the left (i.e., the primary attack for a secondary attack or the secondary attack for a tertiary attack) has obtained a non-Tiny critical this round, then this attack occurs in the following round.

opt — The creature may use this attack (usually a weapon) if it desires (usually determined by the GM).

Example: *A Gorgon attacks a man. On its first round of attack it has a 100% chance of using its Medium Horn attack with a 40 OB ("40MH_o100"). It gives the man a "10AP" result. Since it got a non-Tiny critical result, it makes a Large Bash attack with an OB of 60 ("60LB_a«"); otherwise, it would not have gotten any more attacks in the first round. With the large bash attack, it gives the man an "11BU". Since the Gorgon got a non-Tiny critical with its large bash attack, it will get to make a Large Trample-Stomp attack with a 50 OB next round ("50LTs √").*

13.4 CONVERTING AND CREATING CREATURES

Trained or usually intelligent animals may have higher offensive bonuses, and use different combinations of attacks than those presented on the Statistics Charts. These statistics are only meant to be a sample and the GM should feel free to use the provided tables for describing and designing his own animals and monsters.

A good rule of thumb for converting monsters is to:

- Determine the size (Tiny, Small, Medium, Large, or Huge) and type of attack.
- Determine the Maximum damage for each type of attack (usually the size).
- Determine an appropriate offensive bonus. If this cannot be easily set, approximate it by +10 per hit die that the creature normally has under your system.

The following charts can also be useful in handling *AL&CL* creatures during play and in converting other creature statistics into *AL&CL* statistics.

SIZE CHART					
Size		DB Mod.*			
Tiny		30			
Small		20			
Medium		0			
Large		-10

BF	Blindingly Fast	50	-20	25	120

* — These modifications have already been factored into the animal and monster stats given. They are included to facilitate designing your own animals and monsters.

† — This DB Modifier applies if the animal is actively fleeing or evading pursuit. The animal must be moving.

‡ — This DB Modifier is only used when an animal attacks a target from the front without surprise. The animal's DB is only modified with respect to the target's attack. If this modifier is applied, the target gets the first attack.

§ — Have not been factored into the DBs of the sample animals and monsters, and thus must be applied as the situation calls for.

LARGER/SMALLER THAN NORMAL ANIMALS

The statistics given for animals apply in general to the size and nature of the animal found in our world. For creatures smaller than normal (e.g., a baby elephant), decrease the *Size*, *Hits*, and *Max* (on attacks), but leave the pattern of attack the same. Similarly, for larger than normal animals (e.g., giant crabs, huge birds, giant spiders, etc.) increase the *Size*, *Hits*, and *Max* (on attacks), but leave the pattern of attack the same. The OBs for various attacks should be decreased for smaller animals and increased for larger animals.

ATTACKS BY GROUPS OF SMALL ANIMALS

Swarms or groups of tiny creatures (Bees, Ants, etc.) may be given a small attack on the appropriate table. Some of these "swarm" attacks are indicated on the charts (Bees, Birds, Crabs, Lizards, etc.).

Codes: Most of these statistics are standard AL&CL combat statistics: Hits, AT = Armor Type (Section 4.1), DB = Defensive Bonus (Section 4.4), level (for RRs, see *ChL* and *SL*).
Size: See Section 13.4. T = Tiny, S = Small, M = Medium, L = Large, H = Huge; L* = Any criticals against this creature are resolved using the Large Creatures rules (Section 6.4.3); H* = Any criticals against this creature are resolved using the Super-Large Creature rules (Section 6.4.3).

Speed: See Section 13.4. MS = Movement Speed, the rate at which the animal is capable of travelling; AQ = Attack Quickness (speed of animal's attack).

Attacks: See Section 13.3. The attacks are given in the following form: *OB Attack Size Attack Type Additional Information*.

OB: The standard Offensive Bonus for this attack.

Attack Size: Maximum result allowed on attack table (see Section 6.4); S = Small, M = Medium, L = Large, H = Huge, no code for Tiny attacks).

Attack Type: Type of attack: Ba = Bash/Ram/Butt/Knock Down/Slug; Bi = Bite; Cl = Claw/Talon; Cr = Crush/Fall; Gr = Grapple/Envelop/Swallow; Ho = Horn/Tusk; Pi = Pincher/Beak; St = Stinger; Ti = Tiny Animals; Ts = Trample/Stomp; Wp = Weapons.

Additional Information: See Section 13.3. # = the % chance of this attack being used; « = If the attack given on the left (i.e., the primary attack for a secondary attack or the secondary attack for a tertiary attack) has obtained a non-Tiny critical this round, then this attack occurs in the same round; √ = If the attack given on the left (i.e., the primary attack for a secondary attack or the secondary attack for a tertiary attack) has obtained a non-Tiny critical this round, then this attack occurs in the following round; opt = The creature may use this attack (usually a weapon) if it desires (usually determined by the GM).

* — Defensive Bonuses (DB) so marked are obtained from the normal process with an extra bonus for especially tough hides, quickness, stature, and general factors concerning the fearsomeness of the creature.

2X Damage: Target receives double the hits by the tables.

QUESTIONS AND ANSWERS

Over the years we have received and answered many questions regarding the interpretation of *AL&CL* rules. In this section, we present some of those questions and our answers to them; a GM may use this material for rules clarifications or as optional material.

THE BATTLE ROUND SEQUENCE

How do you handle combatants reacting to the activities of other combatants during a round?

This is how we handle activity: each phase, after the GM decides (for himself) what the NPCs plan to do, the PCs intentions are announced, and then activities are resolved by some sort of initiative determination. A combatant that moves or maneuvers less than his allowable total (even by 5 or 10%) may react to an opponents movement (e.g., change facing, move slightly, etc.); he must make a successful orientation roll to notice the activity that he wants to react to.

If a character holds back at least 50% of his activity, he may make a maneuver roll to see if he can strike an opponent that tries to run by. Alternatively, after all of the intentions of the combatants are revealed, you might allow some combatants to cancel their planned action and make a maneuver roll to see what percentage activity they get for some other activity (base the difficulty on the new activity that the combatant wants to attempt).

How do you handle Orientation in your games?

We use Orientation Rolls as a very, very general mechanism to assist the GM in determining how aware characters are of the general tactical situation. Generally, they fall into two main categories. First a character performs an unusual action that may leave him disoriented (e.g., longdooring during a combat, tumbling and spinning away from an attack, coming out of a stunned state, etc.); in this case, a low roll may restrict the characters follow-up actions while a high roll might mean that no restrictions apply. Second, something is happening on the battlefield that a dispassionate, uninvolved observer would probably notice, but which a character involved in the battle might not.

How can a character avoid being surprised?

To avoid being surprised, we allow a roll modified by the character's perception and the situation (e.g., noisy room with lots of distractions might give a -50, if the character is expecting the situation to occur it might be +50, etc.). The difficulty should be based upon the situation; e.g., if a character has made a successful stalking roll to sneak up on another character, it might be "very hard" to avoid surprise).

DEFENSIVE CAPABILITIES

Can a character wear two suits of armor at once?

Normally, you can't wear more than one suit of armor; they aren't designed that way. If you do allow it, we would suggest you combine both armor penalties and then increase resulting penalties by at least 50%.

Wearing Armor Types 5-8 seem to be worse than wearing no armor. What's the story?

Section 4.1 of *AL&CL* says exactly this about Armor Types 5-8: "... worn as weather protection by certain civilians and as combat protection by some militia and irregulars."

Thus ATs 5-8 are considered to be cold-weather clothing and cheap "armor" for militia type combatants. These ATs are easier to hit than AT 1, but they reduce the severity of the criticals taken as shown in the chart for starting critical #s below:

	A	B	C	D	E
AT1	85	89	94	102	122
AT5	70	84	100	113	132
AT6	75	87	103	118	135
AT7	80	89	103	120	137
AT8	85	98	113	129	140

So normal, non-adventuring characters with normal Quickness (e.g., no Quickness bonus) in ATs 5-8 will die less often and sustain less serious injuries than characters in AT 1. This is a very good reason for militia to wear this cheap, and easy to learn to use, armor.

As far as the Quickness penalty goes, remember the Qu Penalty only negates/cancels a Quickness bonus; it does not have any effect on a character with a zero or less Qu bonus. Thus normal characters with an average Quickness of 60-75 will not be affected at all by the armor Qu penalty. Quick characters should wear the

lighter armors to take advantage of their Quickness bonus. (Why do you think Conan, Aragorn, the Grey Mouser, and other great fantasy heroes wore at most a chain shirt instead of plate armor? Because they were really quick and avoided the heavier armor.)

I want to make greaves more important in my game, what should I do?

For Greaves, you may wish to roll a percentage chance that a critical to a specific limb is nullified (perhaps 60% for metal greaves, 40% for rigid leather greaves and 25% for soft leather "greaves"). Movement penalties for RM greaves are already built into the Armor Penalties Table.

Can a character use his shield against one foe and parry another?

The shield DB is a passive bonus that may be applied to any one foe in the proper position (i.e., to the front or to the shield flank); this bonus is applied in addition to any DB due to other factors (i.e., Quickness, parrying, etc.). A character may parry one foe with his weapon and apply the shield DB to another foe or he can parry the same foe that he uses his shield DB against.

Can martial artists parry weapon attacks?

Yes. Parrying is a representation of the emphasis that the character puts on defensive versus offense in a given round. So when martial artist parries a weapon with part of his OB he actually dodges more that round or blocks the arm that wields the weapon.

If a combatant uses 100% of his OB to parry, does he still have to make an attack?

If a player uses all of his OB to parry, he must still make an attack at +0 OB; he has the chance of fumbling or getting in a lucky swing.

Why can't you have a skill bonus for a shield?

You may allow characters to develop "shield skill", but we do not suggest you do so. Shield skill allows a character to in effect double his attack/parry bonus and thus unbalances things in the system. For example, if you allow the development of "shield skill", it would be stupid to use a 2-Handed weapon or a pole arm since you would only have half the potential attack + parry total bonus of a 1-Handed weapon/shield combination.

OFFENSIVE CAPABILITIES

Can an exceptionally strong character use a "2-Handed" weapon in one hand?

We do not normally allow 2-Handed weapons to be used in one hand (except for bastard swords, jo's, and nunchaku). But if a character with enormous strength wanted to do so, you might allow him to develop separate skill with a 2-Handed weapon used in one hand and then apply a special penalty of between -20 and -50 depending upon the weapon.

Why don't weapons with a magic bonus deliver more damage than normal weapons when they achieve maximum results?

It is assumed that a weapon with a "bonus" (e.g., a Mithril quarterstaff) is used the same way, balanced the same way, and delivers the same maximum damage as any weapon of that type — because otherwise normal skill ranks with that weapon would not be usable and skill would have to be developed separately for the bonus weapon. This means that the bonus weapon delivers damage more frequently and is easier to strike and parry with but it does not deliver more damage when optimum results are obtained. The exception to this is that criticals with Mithril and magic weapons against Large and Super-Large creatures are more deadly.

One of my characters wants to throw sand in an opponent's face during combat, help!?

The character could develop an OB with "thrown sand" (as a thrown weapon). He would use the Grapple Attack Table (Small attack maximum) with double normal shield DB and no weapon DB; and the target may parry normally if he is aware the attack is coming. A non-zero result would deliver no normal damage but it would force the target to make a Resistance Roll against a 1st level attack (see *SL* or *ChL&CaL*), modified by -1 per hit delivered and -10 for each severity of any critical (i.e., -10 for an A, -20 for a B, etc.).

If a foe is down, surely he's prone to attack? Why can't you apply both the down bonus and the prone bonus?

The prone bonus is normally used for totally inactive foes; downed foes are still active and may be rolling around on the ground. If you think the penalty to a downed and prone foe is not high enough, use both bonuses.

COMBAT RESOLUTION

How do you handle attacks against a sleeping or unconscious foe that you are standing over?

We just require a simple maneuver to kill an unconscious or sleeping foe. This is called having an overwhelming advantage.

How do you handle damage to structures?

We don't have a fixed method for handling damage to structures, we just jury rig something when we need it. Currently, we assign doors a AT of 20 (stone, metal, or metal reinforced) or AT 12 (wood) and a certain number of hits (50-1000) and let people "attack" them normally.

How would you determine if an arrow fired at a foe with a shield misses or sticks in the shield?

If the arrow would have hit the target if he had not had a shield, you may assume that the arrow either stuck in the shield or glanced off.

Do Large and Super-Large creatures still take the hits from the normal attack tables?

Yes

I feel the sling attack table delivers too much damage; what should I do?

For your own game, you can always decrease the hits given out by various weapons (e.g., half the hits, quarter the hits, etc.).

MANEUVERING

Why don't characters without armor get a big maneuver bonus?

A character in AT 1 has a +0 armor penalty; a character in AT 18 has always has at least a -20 armor penalty for all of his maneuvers; this is equivalent to the difference between a very agile character with a 98-99 Agility (+20 bonus) and an average character with a 40-59 Agility (+0 bonus), i.e., a really big difference. In addition, the AT 1 gets his entire Qu bonus for his DB, while the AT 18 character gets a -20 Qu penalty.

MARTIAL ARTISTS

We find martial artists to be too powerful in combat; what can we do?

From our experiences with *RM* tactical situations, a martial artist's (MA) advantages due to Adrenal Defense are balanced by: his higher development point costs; by his inability to benefit from armor, shields, magic armor, magic shields and magic weapons; and by his weaknesses in missile fire situations and against animal and certain spell attacks.

Ignoring stat bonuses and assuming two skill ranks per level in combat skills), a 10th level MA will have an OB&DB total of: $164 = 72$ for Adrenal Defense + 72 for skill bonus OB + 20 for level bonus.

Ignoring stat bonuses and assuming +10 or +15 equipment and assuming two skill ranks per level in combat skills, a 10th level Fighter will have an OB&DB total of: 156 (up to 181) = 35 (up to 50) for shield + 10 (up to 15) for armor + 72 for skill bonus OB + 30 for level bonus + 10 (up to 15) for weapon.

To develop the above capabilities will cost the Fighter 13 Development points per level for one melee weapon and one missile weapon, it will cost him just 1 or 2 DPs per level for each addition weapon he wishes to develop skill for at a rate of one skill rank per level.

To develop the above capabilities will cost the Martial Artist 26 Development points per level for just one area of martial arts and no other weapons. It will cost 46 DPs per level for both areas of martial arts and one missile weapon at one skill rank per level.

So martial artists may be good in combat, but to do so they will give up flexibility and the capability to do anything else.

In a missile combat the MA's abilities really decrease: his ADef is halved to 36 against missiles, and cannot be used at all if the MA is holding a bow (i.e., ADef cannot be used if a "non-weapon kata weapon" is held in hands). In addition, the MA cannot normally use part of his OB to parry missile attacks (i.e., he has no shield). Meanwhile, the fighter gets his full shield and armor bonus and can parry if he holds a shield.

Many animal and spell attacks will tear up a MA in no armor, while a Fighter in chain or plate does better.

If your game does not have weapons, armor and shield with bonuses, martial artists will be very powerful. If you give Martial Artists lots of stuff like "bracers or defense" and allow them to "parry" missile attacks with their OBs, they can also get out of hand. But as written the disadvantages of martial artists balance out their advantages in most of the campaigns we have been associated with.

CREATURE CAPABILITIES

Can animals and monsters parry?

Intelligent creatures can parry normally if they have something to parry with (e.g., horns, a shell, armor, etc.). A GM may wish to allow other animals to "parry" by dodging in a manner similar to Adrenal Defense; in this case, only half of the parry OB is added to the animal's DB (e.g., if the animal uses 40 of its OB for parry, its DB would only be increased by 20).

How do human stats compare with creature stats?

For the "strength" Initiative Determination modifier when animals are fought, use the Size factor for who has the greater strength (treat normal humans as "M" size); assume a tie for the same size unless some other factor makes it clear who is stronger.

Human "Speeds" would normally range from Creeping to Fast in animal terms.

Why do creatures take so many hits?

Our assumption for animals having a large number of hits is that: hits only represent pain, shock, and minor damage that leads to unconsciousness; they do not represent critical damage. Men (without training) tend to faint, pass-out, or go into shock when encountering too much pain, while beasts tend to react to pain instinctively by avoiding it or by attacking the source of the pain. Seldom do aggressive animals "pass out". Animals have other major disadvantages: they tend to act in a predictable manner and they can not parry attacks.

I feel your creature statistics are too powerful; my groups seem to have too much trouble with normal animals. What should I do?

Your problem with stats for *Rolemaster* creatures is caused by play balance factors inherent in the flexibility and diversity of the system. A typical player character fighter can start with an OB of around 33-48: +10-25 (for stats, a character gets free 90's in his prime stats) +20 (for 4 skill ranks) + 3 (for his level). With the optional hobby rules (4-5 skill ranks) and background options this can be raised to an OB of 53-100. He can start with armor and a shield that give him an AT of 5 to 20 and a DB of 25-50 (with a shield, depending on stats).

So you see that when starting character OBs can range from -25 to 100 and DBs will vary enormously, play balancing stats for creatures becomes a difficult chore. Creatures cannot parry, they are extremely vulnerable to missile fire, and they will often flee when faced with determined opposition. In a normal adventuring situation, characters are in a group that has a cohesiveness that is not available to non-social creatures. Such a group also has the advantage of missile fire, organization, and planning that cannot be matched by creatures.

The main problem is that while we feel the stats given in *AL&CL* and *C&T* are balanced and appropriate for adventuring groups, they are not always consistent with "realistic" situations like ones we might encounter in our world. The *C&T* stats should be taken as guidelines, for example, the # Enc. stat should only be used in a totally random environment. If you feel the animal stats are too large (and I agree that they are probably too large for a "realistic" environment), just decrease them across the board by say 25-50% and you will have a low-powered environment for your groups.

You are correct about animals being dangerous, I was once in a group of five 1st level characters that got run around for over 20 rounds by one angry boar (we barely wounded it and it finally just wandered off, we never killed it). This, however, is realistic. Medieval groups would hunt boar in groups of 4-20 men with dogs, horses, and special equipment (e.g., boar spears); our 5 man group consisted of a Warrior Monk, a Ranger with a sword, a Fighter with a regular spear, an Astrologer, and a Healer — needless to say we didn't have much of a chance.

MISCELLANEOUS

How were the AL&CL attack tables created?

The *RM* attack tables were computer generated, but the program was "data-driven". That is, each column (i.e., each AT for each weapon/attack) had a set of data (about 15 pieces of information) associated with it that reflected how effective that attack/weapon was against that particular AT. So you can see that each attack table requires 300 pieces of data to generate. To further complicate this process, some of the attack tables were initially generated in this manner and then modified due to play-testing and input from various sources.

Why does the fantasy weapon, Irgak, do two criticals?

First, the Irgak does 2 crits because it is magical, and we assume it lands two blows in the same round.

My characters are bleeding to death; help!

Hits per round can normally be stopped with a compress and bandage if the patient does not move at more than a walking pace for the next 8 hours (up to 1, 2, or 3 hits per round depending upon a maneuver roll). A tourniquet on a limb can stop 4 to 10 hits per round on a limb wound, but until the wound heals the tourniquet must be loosened once every 24 rounds and 3 hits per round taken for 5 rounds.

Some of my players cheat; what can I do?

I'm sorry, but you have to handle cheating on your own. If you have real problems, create a special table in which a character's roll is converted to the roll that is actually used (e.g., a roll of 64 might be converted by the table to a 31, a 58 to a 24, a 99 to a 43, etc.).

Note: An F-severity critical result indicates an E-critical roll on the Slash Critical Strike Table and a C-critical roll on the Krush Critical Strike Table.

Note: Animals attempting to hold onto a target (on this table) may be given an additional attack on the Grapple Attack Table if they obtain a critical strike result on this table.

Critical Strikes: P = Puncture, S = Slash, K = Krush, G = Grapple, U = Unbalance, T = Tiny

NOTE: An F-severity critical indicates an E-critical roll and a C-critical roll (both Grapple criticals).

NOTE: For each consecutive round that a creature obtains a critical strike (on this table), the creature obtains an additional +10 against that target.

CRITICAL STRIKES: P = Puncture, S = Slash, K = Crush, G = Grapple, U = Unbalance, T = Tiny

NOTE: An F-severity critical result indicates an E-critical roll on the Puncture Critical Strike Table and a C-critical roll on the Unbalance Critical Strike Table.
NOTE: If the attacking creature is "charging," it obtains a +20 on this table in addition to its other bonuses.
CRITICAL STRIKES: P = Puncture, S = Slash, K = Krush, G = Grapple, U = Unbalance, T = Tiny

NOTE: An F-severity critical result indicates an E-critical roll on the Unbalance Critical Strike Table and a C-critical roll on the Crush Critical Strike Table.
NOTE: If the attacking creature is "charging," it obtains +20 on this table in addition to any other bonuses.
CRITICAL STRIKES: P = Puncture, S = Slash, K = Crush, G = Grapple, U = Unbalance, T = Tiny

NOTE: A critical result means the attack has injected poison, in addition to a normal critical result (if applicable).

NOTE: Swarms of very small creatures (i.e., bees) could roll on this table as a small attack. NOTE: A really huge stinger (longer than 1') should use the Horn Attack Table.

CRITICAL STRIKES: P = Puncture, S = Slash, K = Krush, G = Grapple, U = Unbalance, T = Tiny

NOTE: An F-severity critical indicates an E-critical roll and a C-critical roll (both Krush criticals).

NOTE: If the target is down the attacker obtains +30 in addition to its other bonuses.

CRITICAL STRIKES: P = Puncture, S = Slash, K = Krush, G = Grapple, U = Unbalance, T = Tiny

* — Minimum maneuver modification applied to a combatant fully trained in maneuvering while wearing the given armor type. See *ChL* Section 3.4.

† — Maximum maneuver modification applied to a combatant totally untrained in maneuvering while wearing the given armor type. See *ChL* Section 3.4.

‡ — The missile attack penalty acts as a modification to the missile OB for a combatant wearing the given armor. This is meant to reflect the disadvantageous effect of armor worn on the arms of a combatant.

§ — An armor Quickness penalty can reduce or cancel a combatant's Quickness stat bonus for his DB (see Section 4.4.2). Unlike those penalties above, this penalty can only reduce the armor wearer's Quickness stat bonus. It will not reduce a combatant's overall DB below the level that it would be at with a zero Quickness stat bonus.

8.2.6 DEFENSIVE MODIFICATIONS TABLE

Effect	Category and Notes
+ (variable)	Armor quality bonus, Adrenal Defense bonus, (Quickness stat bonus - armor Qu penalty), spell bonuses, special item bonuses. These factors are usually fixed for a given character. (See Section 4.4.)

PRODUCT LISTING

Rolemaster

I.C.E.'s classic FRP system. **Rolemaster** is a complete set of the most advanced, realistic, and sophisticated FRP rules available. The flexibility of the system allows it to be used wholly or in part with most major FRP systems.

Space Master

The ultimate adventure frontier is brought to life with I.C.E.'s Science Fiction Role Playing System. A complete game in one box, **Space Master** provides everything necessary to run a realistic, richly detailed science fiction campaign.

Middle-earth Role Playing

Middle-earth Role Playing (MERP) is perfect for the novice as well as experienced gamers. Designed with faithful attention to Tolkien's world, **MERP** provides rules covering combat, magic professions, and everything necessary for adventuring in Middle-earth. **MERP** is the perfect lead-in to the more complex **Rolemaster** system.

Shadow World

The planet Kulthea forms the **Shadow World**, a unique fantasy gaming environment supported by comprehensive stats for both **Rolemaster** and **Fantasy Hero**. The **Shadow World** is a vast planet of scattered isles and lost realms, each land isolated by forces both tangible and supernatural. Not only is it a rich fantasy world unto itself, but it allows the GM to insert it into his **Rolemaster** or **Fantasy Hero** campaign whole or in part.

IQ (Iron Crown Quarterly)

In the immortal tabloid format, the **IQ** is sixteen pages packed with advanced product info, inside ICE stuff, humor, occasional fiction and reviews, and featured **MERP/Rolemaster/Space Master** material!

The Hero System Rulesbook

The **Hero System** is simply the most flexible and comprehensive roleplaying system ever created. Design characters exactly the way you want them to be. Then play in any setting—from Fantasy to Science Fiction—all with the same rules!

Champions the Super Role Playing Game

Don't just read comic books, live them! **Champions** contains the HERO System rulesbook, along with everything you need to start your own comic-book game.

Fantasy Hero

Fashion your own fantasy universe of Epic Adventure! Bring to life your favorite character from fiction or create your own exciting hero.

Star Hero

Reach for the stars with **Star Hero!** This self-contained game includes the description of a complete science fiction universe and several scenarios—everything you need to begin a campaign.

Adventurers Club Magazine

The mag for Hero Gamers! The articles and columns are dedicated to expanding and improving the already fine line of Hero games. And there's a ready-to-play adventure in each issue!

These fine products are sold at better retail outlets worldwide. Ask for them at your favorite store . . . or order directly from us. VISA & MASTERCARD orders call (800) 325-0479. VA residents, Canadians and overseas customers call (804) 295-3917. Please make phone orders during business hours: 9 AM-5PM, Eastern Standard Time, Mon-Fri. **Allow 4-6 weeks for delivery.**

Arms Law & Claw Law™

Arms Law & Claw Law™ is the highly acclaimed combat system that improves any game and serves as one of the three cornerstones of the Rolemaster™ system. Now reformatted and reorganized, **AL&CL** adds flavor, realism, and depth to your campaign without sacrificing playability. Feel the thrill of melee, brace against a monster's charge, master the martial arts, let your arrow fly—do battle with the best combat system around, **AL&CL**!

Rolemaster™ gamers now have an entire fantasy world at their fingertips. **Shadow World™** products form a rich fantasy environment for the Rolemaster™ and Fantasy Hero™ game systems. The self-contained adventures may also be used as isolated or hidden areas in any Gamemaster's campaign world.

Arms Law & Claw Law™ provides:

- A fantastic medieval melee and missile combat system with a Fumble table, a Maneuver table, individual attack tables for thirty weapons and statistics for a dozen more
- A dozen attack tables that integrate the size, instincts, and fighting patterns of a wide variety of animals, monsters, and martial artists
- Ten Critical Strike Tables: Slash, Puncture, Crush, Grapple, Unbalance, Tiny Animals, Large Creatures, Super-Large Creatures & 2 Martial Arts Tables
- Comprehensive rules cover every essential aspect of armed and unarmed combat in a FRP environment: fumbles, parrying, moving, maneuvering, critical damage, first swing determination, orientation, armor, and much more
- Rules and tables designed to be used as part of Rolemaster™ or as the combat system for other FRP games

Rolemaster™

The completely reformatted Rolemaster™ system also includes the following:

- **Spell Law®** — The magic system that improves any FRP game! The new edition of **Spell Law®** has over 2000 spell descriptions based on 3 realms of power and 15 professions. It provides alchemy rules, spell attack and failure tables, and a unique spell-learning structure.
- **Character Law & Campaign Law™** — The new version of the complete character development and campaign guide! **Character Law™** features a unique trait development system that allows characters to increase their ability in any area of skill. There are no absolute restrictions. **Campaign Law™** includes handy reference material invaluable to any Gamemaster: weather, encounter, and price charts, and guidelines for running a campaign in a complex living world.
